The Success Story of...

Wm. TRICKER, INC. and AMERICAN WATER LILY CULTURE

WILLIAM TRICKER
Founder

Few men live to see so many enjoy the fruits of their life's labors as did William Tricker. Throughout his days, he had a deep love for green, growing things, and it was this that patterned his life.

Early in life he became intensely interested in green, growing things and felt the strong desire to produce them so all could enjoy their beauty. He particularly liked Water Lilies because they were so hardy that anyone could grow them with no experience, and their beauty among flowers was unsurpassed. What he accomplished in bringing garden beauty within the

economic and physical grasp of everyone is well known. But what is not so generally known is how he attained success in this direction.

William Tricker was born in England, and in 1880 decided to try his fortune in America. Upon arriving in this country, he first saw Water Lilies growing at Newport, Rhode Island. He was immediately impressed with their delicate beauty. Later while working on a private estate on Staten Island, he found opportunity to experiment in growing lilies in pools and tubs. It was at this time that he envisioned the future of water lily culture in the United States. William Tricker felt the need for someone who could produce water lilies in quantity, with uniformity, and at a cost low enough so everyone could enjoy them.

With these aims in mind, he established a commercial water garden at Clifton, New Jersey, in 1895. This was the first ever to be established in the United States. In this same year, William Tricker found the need of a catalogue with which to inform people of the lilies he had for sale, and to aid them in growing those that they purchased. Thus was produced the first American catalogue of Water Lilies. Today as then, the Tricker Catalogue

embodies ideas not found in other catalogues. You will note how it deals not only with items for sale, but with information which will lead to greater enjoyment of the purchase. In the pink pages of this book, you will find simple, but careful explanations on growing water lilies. It is believed this is the most clear and complete basic description for any horticultural specialty item. Then, as on page 21, there are descriptions of other books which may be obtained for further reading. These were carefully selected with the basic idea of the founder in mind.

Mr. Tricker did not stay long at Clifton, but continued his hybridizing in connection with other work, and soon transferred the business to Arlington, New Jersey, where he was active until his sudden death in 1916.

Besides innovations already mentioned, Mr. Tricker originated the idea of grouping water lilies in collections, so the beginner could have a pre-selected group that would be in excellent harmony. This was also of interest to the experienced water lily grower, because these collections represented special prices. This grouping has been

a most important factor for new and experienced water lily growers in planning their garden pools.

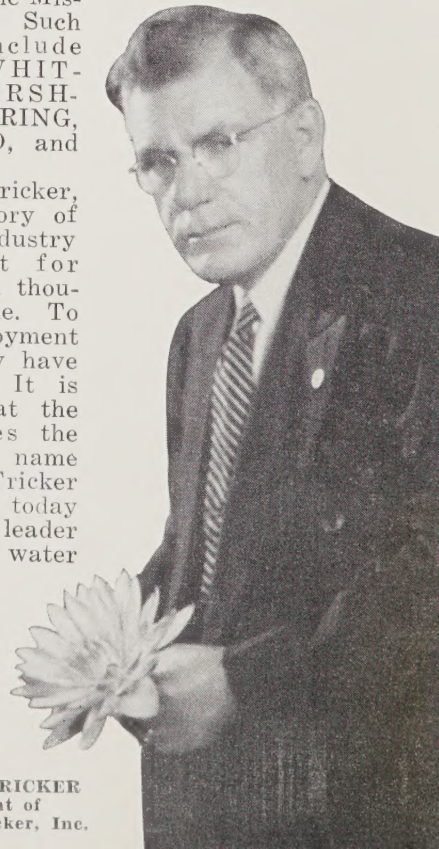

Results of Mr. Tricker's hybridizing produced such varieties of day blooming tropicals as BLUE BEAUTY, MRS. C. W. WARD, WM. STONE,

MRS. WOODROW WILSON and PANAMA PACIFIC. It is such work that has provided America and the world with uniform water lilies improved in shape, color and hardiness. And, according to the founder's aims and wishes . . . everything from Tricker's is **guaranteed to grow**.

Under the leadership of his son, Chas. L. Tricker, the business continued to expand and in 1927 it became necessary to move to larger quarters to meet the ever increasing demand. The firm moved to Saddle River, New Jersey, and also established a Plant at Independence, Ohio, with combined facilities at both plants to adequately serve the whole country . . . and today the entire world. Since the death of William Tricker, the same ideals have been pursued. Hybridizing has been continued, and Tricker's has also been privileged to disseminate varieties originated by Mr. George H. Pring of the Missouri Botanical Gardens. Such beautiful varieties include MRS. EDWARDS WHITAKER, GENERAL PERSHING, MRS. GEORGE PRING, ST. LOUIS BAGDAD, and DIRECTOR MOORE.

The story of William Tricker, Inc., is an American story of success in building an industry of enjoyment for thousands upon thousands of people. To many this enjoyment is such as they have never known. It is with pride that the firm preserves the ideals and the name of William Tricker . . . and is today the established leader in the field of water lily culture.

Water Lilies

AND MODERN LIVING

The world in the year 1950 is a world devoted to speed. Call it the atomic age if you will, but human-wise the accent is on speed.

Speed in production . . . speed in business . . . speed in housekeeping . . . speed in living our normal lives. This represents a problem for Americans, the solution for which many thousands of dollars are spent each year.

Yet, while authors continue to pour out volumes on releasing the individual from nervous tension . . . here is a sure way all can do it. Water gardening will bring to you a new form of living. Aquatic plants and flowers, for many people, completely clear the mind of the worrisome patterns of everyday thinking. The same benefits which accrue during a once-a-year vacation can become yours at the end of each day. A famous Chinese philosopher once said that he who gardens will be eternally happy.

Let's consider an example that might be your case. We will presume you are not overwrought, but just want an interesting hobby which will take you outdoors for relaxation. You read this catalog. You find the beauty of water lilies interests you, but you find you are faced with the problem of a pool. Searching further on these pages you find small pools are available and that they are at a very low cost; that the firm will furnish plans for larger pools. You decide to send for a Tricker Mir-A-Pool and several collections. Before several days have elapsed, you are happy to receive your order. At this point the fun really begins.

The simple instructions in this catalog carry the entire story, and quickly reading them over is all that is necessary to start. You will find your entire family deeply interested and anxious to help in installing this water garden which will very quickly turn into the most beautiful spot in the neighborhood. It won't be long before the first water lily blooms and you will be posing its beautiful blossom in your hand with the professional adroitness of Mr. Tricker himself. Evenings, afternoons, and week-ends you will find great joy in your creation. And, like the vacation again, after an hour or two with your water garden you will find yourself much more efficient at the speed-of-living things that fall your lot. Success of your venture will be insured by Tricker's unconditional guarantee that everything you buy will grow.

If you are one of the people who have long been customers of William Tricker, Inc., you will experience this joy each year and it will be further enhanced by your yearly choice of fine water lilies. Last year it was the Rainbow Collection. This year perhaps you will want a different collection or a group of your own selection, including one or more of the newer tropical varieties. At least you will have definite ideas on how to plan your pool.

Many people start their water gardens together and this has become an ever-increasing popular way to begin. Over the back fence or when at social gatherings, Tricker's lilies are often mentioned. Then and there it is agreed two or more parties will simultaneously begin their own gardens. To some people a project of this sort with their friends proves to be a great pleasure. As the weeks pass they find themselves together, talking very professionally about their lilies and will discuss at length whether Marmorata or Gloriosa is the more beautiful.

Low in cost . . . priceless in beauty . . . a joy and relaxation for you. That's the story of modern water lilies and their place in America today. Order now from Tricker, and enjoy water lilies and time-out-of-living at its best.

BLUE VARIETIES

BLUE BEAUTY (or Pennsylvania). One of the oldest hybrid, blue flowering water lilies produced by the late William Tricker, it has really become a standard variety in spite of the many excellent blue lilies later produced. Flowers are 10-12 inches across and deep blue in color. Stamens are yellow and the sepals are marked on the outside with purple lines and dots. Blossoms are small in restricted areas, but if given plenty of soil and room, will produce flowers of largest size. (See color illustration, page 6.) \$2.75.

BLUE BIRD. One of our own introductions. The beautiful cup-shaped blossoms are produced in profusion on strong stems. The flowers are six to eight inches across and open five to six successive days. The color is a really true blue. It has the characteristically compact growth of the viviparous type of water lily. \$3.50.

BAGDAD. The combination of leaf and flower in this variety gives an extremely rich effect not unlike a Persian rug—hence the name. The leaves are conspicuously marked with patches of dark reddish brown. The broad flat flowers are borne rather close to the leaves and are gold centered with pale wisteria-blue petals. It is a very striking plant in any pool. \$3.50.

MARMORATA. Almost identical with Mrs. Edwards Whitaker in description of its flowers, the main difference being in the foliage. The leaves are beautifully mottled and streaked with chestnut brown which makes it an outstanding variety. In our experience this variety has been a slightly more abundant bloomer than Mrs. Edwards Whitaker. \$2.50.

JUDGE HITCHCOCK. Here we have a variety that is truly a novelty. The flowers are large and cup-shaped, and the color in general is a beautiful violet blue. A large number of stamens are produced, gold in color and tipped with blue. This lily has done exceedingly well with us. It grows easily, flowers freely and is altogether desirable. (See color illustration, front cover.) \$3.25

DAUBEN. (See page 15.)

COLORATA. (See page 15.)

HENRY SHAW. (See page 7.)

MRS. EDWARDS WHITAKER. This variety is perhaps the most striking of all the day-blooming lilies because of its great size. It has been known to produce flowers 13½ inches across. The color is lavender-blue fading slightly as the bloom ages. Always greatly admired at exhibitions. The petals are slightly rounded at the tips. While it is at its best in a large pool, it can be grown in smaller quarters. A very free and continuous bloomer. \$2.75.

PINK VARIETIES

***INDEPENDENCE.** A Tricker variety in the viviparous group produced at Independence. The deep pink color of the stamens seems to have a background of violet. While not of the greatest size, the flowers are borne profusely and have very many petals. The flowers open earlier and close later than most of the day-bloomers. \$2.50.

GENERAL PERSHING. Here, indeed, is an outstanding variety of pink day-bloomers which was named in honor of our great General Pershing. There is no question of its being the finest of the pink tender lilies, both in size and color. The flowers are of great size, full petaled, delightfully fragrant and open early in the morning. The dark green buds are striped with purple. A most prolific bloomer. (See color illustration on page 6.) \$3.00.

MRS. C. W. WARD. A most charming variety with petals of rich rose pink illuminated by a mass of golden stamens. Flowers are borne well out of the water, with profusion of the Gracilis type from which it is a descendant. An old hybrid which has withstood competition of later introductions. \$2.50.

PINK PEARL. Beautiful pearl pink flowers of medium size and produced on stems longer than usual with the tropical lilies. Flowers are produced in great profusion, making a continuously beautiful display in any pool. \$2.50.

CASTALIFLORA—Beautiful pink
(See illustration page 7.) \$2.50.

PATRICIA—The marvelously free-blooming dark pink. (See description page 15.) \$2.75.

AUGUST KOCH

Extremely popular purple day-blooming tropical (see page 4). Its brilliant flowers measure 7 to 8 inches across.

ISABELLE PRING
\$3.25

PANAMA-PACIFIC
\$2.25

MRS. EDWARDS WHITAKER

CLEVELAND. A Tricker production named in honor of the largest city of Ohio and in a suburb of which our gardens are located. The color of the petals is rich, rose pink. The petals being slightly pointed make this lily distinctive among the pinks. Its marked distinction comes in its foliage, for the green leaves are mottled and streaked with chestnut brown, giving a most striking contrast. We consider this a splendid contribution to the day-blooming tropical lilies. \$2.75.

***PEACH BLOW.** Another one of the viviparous group. The pale pink petals of the flowers are flushed with yellow at the base and in the center of the flower is an enormous mass of golden stamens lightly tipped with the same color as the petals. It is free blooming and the flowers make bright rosettes of pink and gold. (See color illustration above.) \$3.00.

PERSIAN LILAC (Pring 1941). This pink-lilac colored lily has an exceptionally large number of petals and with its numerous golden stamens carries its color well at a distance. Clear light green leaves contrast pleasantly with the flower. \$3.25.

MRS. EDWARDS WHITAKER
Great size. Most striking of day-blooming tropicals.
(See page 3.)

\$2.75

WHITE

MRS. GEO. H. PRING. The finest of the really large white day-bloomers. A new and novel type that produces numbers of large, fragrant, white flowers with pointed petals. Very attractive among the pinks and blues in a pond and excellent when used alone in a formal setting. It is the counterpart of the Mrs. Whitaker in pure white. Petals broader at the base and more pointed at the tip. Has been known to produce 13-inch flowers, but like the Whitaker, will also bloom in very small quarters. Will combine with any color. \$2.50.

ALICE TRICKER. A prolific white day-bloomer. With us the flowers have always been slightly larger than our original Mrs. Pring. The petals seem a little broader and are a little heavier in substance. A very vigorous grower doing exceedingly well in outdoor pools. \$3.00.

***ISABELLE PRING.** This variety is the first large pure white of the viviparous group. Its well shaped flowers are of very good size. The color always remains a brilliant white. The variety is reported to be strongly viviparous. (See color illustration at left.) \$3.25.

PURPLE

JUPITER. The most popular of the Zanzibariensis lilies. Years ago we selected one plant of unusual beauty and propagated all of our present stock from it. Moderate growth but flowers are of fair size of deepest blue in color and with purple tints. The bell-shaped flowers are characteristic of the African lilies. The very many stamens differentiate it from other water lilies. Fragrant. Adaptable to all conditions. \$2.50.

***AUGUST KOCH.** Without question the most outstanding of the viviparous water lilies; named in honor of August Koch of the Chicago Park System. The flowers are 7 to 8 inches across. They open four to six successive days. The sepals are purplish-lilac in color and the stamens pale wisteria-violet in color. Compact in its growth. (See color illustration on page 3.) \$2.75.

***PANAMA-PACIFIC.** The last hybrid produced by the late William Tricker. Buds come out of the water, bronzy-green spotted with reddish-brown. The petals are plum purple in color. A most adaptable lily for either pool or tub culture. See color illustration at left. \$2.25.

***ROYAL PURPLE.** This handsome new lily is identical in growth and habit to that excellent variety, Panama-Pacific, except that the color is a glowing royal purple. This viviparous novelty will add a note of regal splendor to your pool. \$2.75.

DIRECTOR GEORGE T. MOORE (Pring 1941). This new hybrid's leaves and flowers, though small, are borne in great profusion. Each plant makes a striking rosette of small leaves on the water—often bears 8 to 10 flowers at one time. Rich purple. \$3.50.

MIDNIGHT (Pring 1941). Something new in water lilies is this dark-violet double flower—all its stamens are replaced by petals, making a dark blue rosette in the center of the lily. Has numerous leaves and is very floriferous. \$4.00.

*See footnote on page 3.

YELLOW

***SUNBEAM.** Brilliant and refreshing as an early morning sunbeam, this variety produces clear yellow flowers. At first they are only slightly darker than the parent St. Louis, but as the flower ages, the color deepens. Sunbeam is classed as a viviparous water lily and for the past three years has been tremendously successful in our own pools. We are certain that you, too, will enjoy the beauty and satisfaction of having this lovely lily in your pool. \$4.50.

ST. LOUIS. The first yellow Tropical Water Lily. Has the excellent features for which Pring hybrids are noted. Produces large yellow flowers and has beautiful mottled foliage. This patented lily offered exclusively by Tricker. (See page 2.) \$3.00.

AUTUMN SHADES

***TALISMAN.** This variety has been named after the "Talisman" Rose since it possesses the same brilliant combination of yellow suffused and overlaid with pink. The flower is large and star shaped. The ground color is a clear light yellow strongly flushed with a bright pink when the bud first opens. As the flower ages, from the second day on, the pink spreads more and more through the petals and the yellow intensifies, giving a general apricot effect. \$3.00.

GOLDEN WEST (Randig). In 1936 Mr. Martin Randig, San Bernardino, Calif., produced some excellent hybrid tropical lilies, among them a seedling from St. Louis. In our own pools this has been outstanding. The beautiful peach-pink flowers change in color to a lovely light apricot as the flowers mature. The green leaves are heavily speckled with maroon. An excellent grower and bloomer—very fragrant. (See color illustration at right.) \$2.75.

GOLDEN WEST

Beautiful peach-pink flowers with exotic, heavily speckled, maroon and green leaves. Price

\$2.75

***AN INTERESTING VARIETY.** Indicates the leaf propagating varieties. All of this group have the interesting characteristic of, occasionally, producing young plants on the surface of the leaves. Often these small plants bear flowers. Some of the viviparous varieties are much more prolific in this manner than others.

GOLDEN WEST

NIGHT-BLOOMING TROPICALS

The most beautiful of all lilies

YOUR pool will put on evening dress every night if you plant these majestic varieties of night-blooming lilies. There is something fanciful about the way the dazzling blooms open as the others are closing in sleep, and remain open all night, reluctantly closing the next morning when the sun again gets bright. On cloudy days they sometimes remain open all day as well. Night-blooming lilies will surely make your pool a show place during the hours when the grounds are most usually enjoyed by family and guests. Vigorous, five-inch pot plants, guaranteed to grow.

RED

EMILY GRANT HUTCHINGS. A new night-blooming water lily of great merit produced at Tower Grove Park, St. Louis, Missouri. It produces exceedingly large cup-shaped flowers of an amaranth-red color. This is certainly a splendid variety and a valuable addition to the list of night-bloomers. (See illustration on page 7.) \$2.75.

H. C. HAARSTICK. As all colors stand out by contrast so the red of H. C. Haarstick becomes a dominating factor in every pool where it is planted. The brilliant red, large well shaped flowers and its copper colored leaves make it a most outstanding variety in any pool. Without question, this is our choice of the finest red flowering night-bloomers. \$2.50.

FRANK TRELEASE. An early introduction that continues well in popularity. The flowers are dark crimson in color and the stamens mahogany. The petals are long, narrow and rounded at the ends. At first the leaves are green, mottled with dark red which change to a bronzy red as the leaves mature. \$2.25.

DEVONSHIRE. Another very old variety still worth cultivating in any pool. Bright rosy flowers standing well up out of the water. A very choice and desirable night-bloomer. \$2.25.

PINK

MRS. GEO. C. HITCHCOCK. This variety is really a glorified Omarana, one of the oldest hybrid water lilies. It is a real rose pink in color, producing flowers of greatest size. Easy to grow and a very valuable addition to the group of night-blooming water lilies. \$2.50.

STURTEVANT. This exceedingly beautiful night-blooming lily is a splendid hybrid variety. The flowers are 8 to 12 inches across and a bright pink. This variety produces a striking effect when several of the immense flowers open in a group. It requires liberal treatment and a hot summer to bring it to its greatest perfection. One of the very best Nymphaeas, making an ideal centerpiece for a large pool. \$2.25.

WHITE

MISSOURI. It is no more than right to place this variety at the head of the list of white night-bloomers. The flowers have the beauty and form of Sturtevant but none of its touchy tenderness. Blooms early. It is nothing unusual to have these flowers 12 inches across. The broad petals give the flower a most distinctive appearance. The young leaves are light coppery brown when they first appear but soon develop to a dark green with deeply serrated edges. Truly a supreme beauty. (See color illustration below.) \$3.00.

JUNO. Under standardized plant names the old variety Dentata Superba became Juno. It is really the most perfect modern flower developed by cultivation from the sacred white Lotus of Egyptian tradition. Flowers 8 to 12 inches across are produced most freely throughout the summer and early fall. The flowers open very wide, almost flat. The stamens are saffron yellow in color. \$2.25.

Tricker's

HARDY WATER LILIES

Beautiful, delicate, colorful and fragrant—Tricker's Hardy Water Lilies provide garden beauty year after year.

Again, Tricker has an impressively fine collection of Hardy Water Lilies. We feel certain no one else can possibly offer such a fine array of colors and types in these fine quality plants.

Everyone loves the hardy lilies. Their lovely blossoms open just above the surface of the water or float gently on it. The leaf stems adjust to the water's depth. If the water is lowered the bud stems twist to keep the bud under water until ready to open. Opening and closing take one hour each and are an hour later and earlier on the first day open.

Hardy lilies are equally at home in concrete pools, half barrels or tubs; and with a little care to prevent actual freezing of the roots, their beauty and fragrance may be enjoyed year after year. Lack of experience will not interfere with results, as water lilies "just grow" when provided with sunlight, rich soil and warm, shallow water.

We urge you to order early to avoid disappointment, if you want certain definite varieties of these fine plants. This class of lilies has become so much in demand it is difficult to maintain a constant supply of each variety throughout the season.

Turn to page 15 for hardy lilies especially desirable for growing in tubs or small pools.

MARLIAC WHITE. One of the old standard varieties of hardy water lilies in the Marliac type. Flowers are of a sparkling white, stamens light yellow, sepals flushed with pink, fragrant, free and continuously blooming and of moderate growth. \$1.75.

CHROMATELLA. One of the oldest water lily hybrids of the Marliac group. It is compact in growth, with flowers of fair size. Chromatella is a clear, rich yellow and produces flowers most abundantly. \$2.25.

MARLIAC ROSE. In the Marliac type this variety is undoubtedly the best of the pinks because of the substance of the flower and its beautiful and attractive shape. Deep pink in color, shading imperceptibly to a delicate rose at the tips of the petals. Excellent for cutting, good size, fragrant and most pleasing. \$2.50.

Crown Jewel Collection

(Collection No. H-5)

The three most popular hardy water lilies. Free blooming, fragrant.

MARLIAC ROSE—Large, fragrant, deep pink.

GLORIOSA

Glorious red lily.
Perfect in form.
fragrant perfume.

Price **\$3²⁵**

GLORIOSA

A lily that is correctly named since it is so exceedingly glorious that we recommend it as the basis of every collection. Let us assure you that Gloriosa, without doubt, sets a standard among hardy lilies and beautiful flowers. Its blossom is a truly remarkable red and is often 6 to 7 inches across, perfect in form and rather double. Its perfume is similar to that of apple blossoms. It is thoroughly at home in pool or lake, and its characteristic small leaf-spread and large blossoms make it an ideal plant for tub culture. **\$3.25.**

GONNERE

An exceedingly double flower. The petals are snowy white and there are so many of them that the flower looks like a huge snowball. Foliage light green. A free bloomer. **\$3.25.**

COMANCHE

Unique among the hardy lilies in that it proudly upholds itself well above the water surface. Flower opens rich apricot and then changes to a deep coppery bronze. You will be delighted with this one. **\$3.00.**

LUSTROUS

If you want an unusually beautiful new lily for your pool, choose Lustrous. The large flowers of this outstanding novelty are marked by a lovely silvery sheen, sometimes called deep peach. Rose pink petals, thick yellow stamens. The sepals are deeper pink on the inside, brown underneath. The Lustrous is a strong grower and very compact as short leaf-stems restrict the spread. **\$3.00.**

GARDEN GAY COLLECTION

(Collection No. H-13)

All favorites of experienced pool gardeners. The five offer a glorious array of color.

LUSTROUS (below) \$3.00

HARDY WATER LILIES (continued)

SUNRISE

As the name suggests, it is a glorious yellow that opens earliest of all. This is the finest of the yellow flowering hardy lilies. Flowers of immense size produced early in the season on established plants and is altogether a striking addition to the group of hardy water lilies. The buds are olive brown with a salmon flush. The long narrow petals stand at various angles, and with their curved sides and crinkled tips give the appearance of a giant chrysanthemum. The general color is a clear yellow with a touch of fluorescent green, the stamens rich lemon chrome. The leaves are almost egg shaped, with wavy, crinkled sides, deep green above and red flecked with dark red brown below. Unusual in form, beauty and fragrance. \$3.25.

PINK, ROSE, and SALMON SHADES

ROSE AREY. The flowers, a deep cerise-pink, sometimes reach 8 inches in diameter. The petals are pointed and have a noticeable curl that gives the effect of darker shading near the edges. We consider Rose Arey one of the best of the Odorata type; a delightful surprise awaits you. \$2.50.

MARLIAC FLESH. A vigorous variety; flowers large, of soft flesh-pink, deepening towards base of petals; fragrant and produced freely and continuously through the season. Desirable and handsome. (See color illustration on back cover.) \$2.00.

MARLIAC ROSE. In the Marliac type this variety is undoubtedly the best of the pinks because of the substance of the flower and its beautiful and attractive shape. Deep pink in color, shading imperceptibly to a delicate rose at the tips of the petals. (See colored illustration on page 8.) \$2.50.

WILFON GONNERE. A very lovely introduction by Marliac. Flowers are cup-shaped, large, double, and rose-pink in color. A splendid counterpart of GONNERE, the double white. Foliage moderate and green. \$2.75.

MASANIELLO. Some years ago we introduced this splendid French hybrid but all too soon our stock was sold out. Lately it has received much attention and we are again offering this fine variety. Its cup-shaped flowers are pink dotted with carmine and have a most pleasing fragrance. A free bloomer and very desirable. Special indeed at \$2.25.

MME. JULES CHIFLOT. White of moderate growth, this plant produces lovely pink flowers of greatest size. The stamens are bright yellow, foliage light green. The rigid flower stalk often carries the blooms slightly above water level. It attracted a great deal of attention in our show pool last year. \$2.75.

LUSTROUS. If you want an unusually beautiful new lily for your pool, choose Lustrous. The large flowers of this outstanding novelty are marked by a lovely silvery sheen, sometimes called deep peach. Rose pink petals, thick yellow stamens. The sepals are deeper pink on the inside, brown underneath. The Lustrous is a strong grower and very compact as short leaf-stems restrict the spread. (See color illustration, page 9.) \$3.00.

NEPTUNE. The flowers of this old favorite are star-shaped and of a deep rose heavily shaded with crimson. The inner petals are faintly spotted with white while the outer petals are almost white but shaded with rose. The early foliage is very interesting, as it is a deep maroon, but changing to green as it ages. A variety which is a splendid free bloomer. \$3.00.

GLOIRE DU TEMPLE-SUR-LOT.

This variety was originally introduced in 1913 but because of its slow propagation has never been pushed to its deserved place. The most double flower we have ever had. The long narrow petals bend in at the top. On the first day of

opening the color is a very tender pink changing to a pure white on the second day. The flowers are extremely large and are very fragrant. Not a particularly free-blooming variety until well established but well worth any room devoted to it. \$3.00.

SOMPTUOSA. When first introduced in 1909 this variety was well accepted. The large flowers are very double and fragrant. The outside petals are rosy pink, but the petals gradually deepen in color toward the center of the flowers and are lightly spotted with carmine. The stamens are deep orange in color. A very desirable variety. \$2.75.

***PINK OPAL.** Deep rich pink in color. The buds are almost round and open into a flower of interesting form. The petals are comparatively short and, on the first day of opening, the flowers are carried slightly above the surface of the water. The flowers are of very moderate size, valuable for cutting and the variety does especially well in restricted areas. (See illustration.) \$1.50.

CHANGEABLE OR SUNSET SHADES

This interesting group includes the fascinating copper-colored varieties, the dainty shades of apricot and orange, and the so-called "sunset colors".

COMANCHE. A French hybrid which has become practically standard in this color group. The flowers open a rich apricot which color changes later to a deep coppery bronze as the flower ages, the oldest flowers showing a glowing red color in the center. The orange stamens present an attractive contrast. (See color illustration on page 9.) \$3.00.

PAUL HARIOT. We always hesitate in expressing a personal choice but we have an especial liking for the very charming variety, Paul Hariot. Its beauty is difficult to describe. The flowers are quite large and are produced freely. The first day the petals are clear yellow, suffused with an orange pink the second day. It gradually deepens to almost red on the following days. A most desirable variety. \$2.75.

ROBINSONI. This variety was originally produced in 1895 by the famous French introducer. The flowers are of medium size, star-shaped. The predominant color is a crimson-vermilion shaded with a rich orange yellow toward the center. The foliage is olive green in color spotted with maroon. This variety is indeed an excellent addition to any group of hardy water lilies. \$3.00.

PINK OPAL

Exceedingly unique shade of pink. Specially priced because of great popularity.

\$1.50

Tricker's Famous Seal is your guarantee of satisfaction . . . If it comes from Tricker's, it's "guaranteed to grow".

YELLOW SHADES

SUNRISE. A glorious yellow variety that opens very early in the morning, which habit, we think, inspired its name. The buds are olive brown. Its long, narrow petals with curved sides and crinkled tips give the appearance of a giant Chrysanthemum. There is a slight trace of green back of the clear yellow of the petals and the stamens are a rich lemon-chrome. Truly an unusual variety in form, beauty and fragrance. (See color illustration on page 10.) \$3.25.

CHROMATELLA. One of the oldest water lily hybrids of the Marliac group. It is compact in growth, with flowers of fair size. Chromatella is a clear, rich yellow and produces flowers most abundantly. (See color illustration on page 8.) \$2.25.

RED

GLORIOSA. This variety heads the list of red, hardy lilies because of its dependability and great attractiveness. It blooms early even on newly set out plants and continues late in the season. It is really a remarkable red in color. Flowers are often 6-7 inches across, perfect in form and quite double. Its perfume is similar to that of apple blossoms. (Illustrated in color on pg. 9.) \$3.25.

ATTRACTION. Larger in size and much deeper in color than Gloriosa. The petals are garnet red. The sepals are almost white with streaks of faint rose but as the flower ages the color becomes a rich, deep red with garnet streaked sepals. Stamens are rich mahogany tipped with yellow. One of the largest flowering hardy water lilies. \$3.00.

JAMES BRYDON. Here indeed we have a superb variety most difficult to describe. It is exceedingly free blooming and produces flowers amaranth rose in color 4-5 inches in diameter. A most desirable variety. (See illustration above.) \$3.25.

ESCARBOUCLE. The flowers being a uniform vermilion red in color stand out in any group of lilies as a most striking variety. A free bloomer and meritorious variety although it is still quite scarce. \$3.50.

CONQUEROR. This variety is very similar in form and character to Attraction except that the sepals are quite white, making a pronounced contrast with the bright garnet red petals which are several shades lighter than Attraction. \$2.75.

NEWTON. We are particularly pleased to have developed some stock of this variety for we have always been a bit partial to it. The enormous flowers are star-shaped in form. The long narrow petals are bright cherry red in color. It has always been much admired by our visitors. \$3.00.

JAMES HUDSON. A very rare variety introduced first in 1912. The flowers are tulip-shaped in form, the petals being sharply pointed. The rare rosy crimson color of this flower develops a beautiful mauve reflection. The leaves are roundish in form and slightly indented. An excellent variety priced at \$3.00.

JAMES BRYDON

Flowers are lush amaranth rose in color. Free blooming. Exceedingly popular variety. (See paragraph at left.)

Price
\$3.25

WHITE

GONNERE. An exceedingly double flowering white hardy lily. The petals are snowy white and so numerous in number that the flower resembles a huge snowball. The light green color of the foliage is a bit unusual in water lilies. On established plants it is a very free-bloomer. (Illustrated in color on page 9.) \$3.25.

MARLIAC WHITE. One of the old standard varieties of hardy water lilies in the Marliac type. Flowers are of a sparkling white, stamens light yellow, sepals flushed with pink, fragrant, free and continuously blooming and of moderate growth. (Illustrated on page 8.) \$1.75.

GLADSTONE. Truly the king of the white lilies because of its great size and dazzling whiteness. Flower opens up to 8 inches across, sparkling in its pure brilliancy. A strong grower but until well established not as free blooming as either of the other white varieties listed above. \$2.25.

HERMINE. A very fine variety of moderate growth. The beautiful snow-white flowers have pointed petals and the lovely flowers look like white stars among the green leaves. Excellent for tub gardens. Price, \$2.00.

VIGOROUS GROWING HARDY LILIES

for Natural Ponds

THESE are the strong, free-growing, spreading varieties that are so splendid for ponds. Varieties listed have luxuriant foliage and beautiful flowers. All are extra hardy and especially adapted for naturalizing. The great leaf spread provides shade and the plants afford protection for the young fish from their natural enemies. Pools used for growing game fishes should by all means be planted with these lilies.

CULTURAL NOTE: Lilies can be planted at the edge of the pond in shallow water for they will naturally spread out into the deeper water. Note the very low prices.

ROSE MAGNOLIA. Flowers of an exquisite shade of pink. 4 to 5 inches across, standing well out of the water. \$1.00 each; \$8.50 per doz.; \$60 per 100.

W. B. SHAW. Flowers large, of rich rose-pink and very fragrant. Strong grower and continuous bloomer of N. Odorata type. \$1.00 each; \$8.50 per doz.; \$60 per 100.

LOOSE. A beautiful, large white lily, 5 to 7 inches across, with a delightful fragrance. Especially desirable because of its freedom and continuance of blooming. The flowers open very early in the day. One of the best of the white Nymphaeas. \$1.00 each; \$8.50 per doz.; \$60 per 100.

Pool planted with Tricker's lilies mirrors trophies at National Air Races in Cleveland, Ohio. Each year, thousands of people enjoy the beauty of Tricker's lilies at this great event.

HOPATCONG (Odorata Gigantea). This is a native of the southwestern states. It requires deeper water than usual and more room to spread than any other lily. It is excellent for naturalizing. The leaves are light red underneath and the flowers are very large and pure white in color. Fine for bold contrast. 50¢ each; \$5.00 per doz.; \$25 per 100.

HELEN FOWLER. An exquisite pink Nymphaea of the Odorata type. The unusually fragrant flowers are borne above the water and are desirable for cutting. As the leaves are small, this variety is also excellent when used in small pools. Certified by the Horticultural Society of New York. \$1.50 each; \$15.00 per doz.; \$90.00 per 100.

.... Great Joy

I get great joy as do many others from the water lilies. They are unsurpassingly beautiful.

Mr. Hal Hentz
Winter Haven, Florida

Garden of
Mrs. Gordon Cole.
Dowagiac, Mich.

The SACRED LOTUS

or Nelumbium

THE spell of the Nile still hovers around the blossoms of the Sacred Lotus even when this strikingly beautiful plant is grown in our twentieth century gardens. Four thousand years ago in the sacred gardens of Egypt, where dwelt the priests and where the people came to worship, there were pools of granite porphyry in which the Sacred Lotus grew, dedicated to the ancient deities. The Lotus, springing from the mud, lifting its golden-headed blossoms high over the water and opening pure and spotless to the sun, was symbolic of the rise of the soul of man.

There is perfect beauty in the leaf, bud and opened flower of the Lotus. The great concave, shield-like leaves, often 2 feet in diameter, and many petaled flowers, like gigantic roses with delightful fragrance, form a striking picture of great artistic quality. Cultural directions on Insert, Page A.

Prices are for tubers. The potted plants of each variety are available at an additional cost of \$1 each.

EGYPTIAN LOTUS (*Nelumbium Speciosum*). This is the true flower of the Egyptians and possesses a strange haunting fragrance. The blossoms are an attractive pink. An excellent variety that grows very hardy and freely in the latitude of Cleveland. Tubers, \$2.50.

ASIATIC LOTUS (*Album Grandiflorum* or *Magnolia*). A splendid white Lotus of gorgeous beauty. The flower is a fine, pure white of large size and delicate fragrance. The leaves are large and deep green color. One of the best white Lotus. Tubers, \$2.50.

AMERICAN LOTUS (*Nelumbium Lutea*). The perfect yellow flowers of this variety attain a diameter of 8 to 10 inches. Sometimes this is known as the Water Chinquapin, especially in those parts of the country where it grows in the wild. Tubers, \$2.50.

FLAVESCENS. All of the *Nelumbiums* (Lotus) are so strikingly beautiful that it is difficult to select one variety more beautiful than the others. However, *Flavescens* is a most welcome newcomer that has pleasing cream-colored flowers. It is very free blooming. Tubers, \$3.00.

SHIROMAN. This variety produces pure white, double flowers. Double flowering Lotus are extremely scarce. This variety is most desirable. Price, \$5.00.

Flowers and Seed Pod of the Egyptian Lotus.

DOUBLE FLOWERING ROSE LOTUS

(*Nelumbium Roseum Plenum*)

Deep rose pink. Beautiful globular flowers which are very double. Double-flowering *Nelumbiums* are very rare. Tubers, \$4.00.

SPECIAL LOTUS COLLECTION No. L-1

One each of the three, Egyptian, Asiatic and American Lotus, described to the left. A beautiful trio—pink, white and yellow. (Value \$7.50) for **\$6.65**

VICTORIAS Aquatic Marvels

VICTORIA (V. Trickeri). An interesting aquatic plant characterized by enormous leaves, often 6 feet across, with the edges turned stiffly erect to the height of 3 to 8 inches. The weight of a girl is easily supported by the leaves. Victorias thrive under the same conditions as the tender lilies but for full development require plenty of space.

A variety which does well with proper care in the latitude of Cleveland. The flowers are enormous, 15 to 18 inches in diameter, opening white on the evening of the first day, and closing the middle of the following morning. On the second day the flower opens about four o'clock in the afternoon and is colored a deep pink. The fragrant flowers smell very much like a ripe pineapple. Adapted only to very large pools or natural ponds where they are very showy. \$10.00.

EVENING STAR COLLECTION

Our Three Finest
Night-Blooming Tropical Lilies
(Collection No. T-11)

Their beautiful blooms will add immeasurably to the enjoyment of your pool during the evening hours.

H. C. HAARSTICK. New brilliant red night-bloomer.

MRS. GEORGE C. HITCHCOCK. Lovely dark rose-pink.

MISSOURI. Finest white; a supreme beauty.

\$7.10

Victorias in the lily pools of Mrs. Lottie B. Follett, Angleton, Texas. Note great size and hardiness of these plants as well as the attractive interspersing of tropical lilies.

CULTURAL DIRECTIONS

Your Questions Are Most Likely Answered Here

Please consult these directions and diagram below before writing us.

HOW TO PLANT

Water Lilies are very easy to grow. Under natural conditions the roots are in rich soil in the shallow water of a marsh or pond exposed to full sunshine. These conditions are easily reproduced in the garden. In natural ponds—Hardy Water Lilies may be planted in water from 6 to 18 inches deep and are planted simply by pressing the root into the good soil at the bottom. Small artificial pools should be at least 1 foot deep, allowing for 6 inches of water over 6 inches of soil. In larger pools we always recommend the use of containers, either tubs or boxes, holding at least one bushel of soil. The depth of the water may be from 6 to 12 inches over the tub or container. Artificial pools need not be more than 24 inches deep. Twenty inches makes a satisfactory depth. The medium size tubs we offer on page 18 are excellent for Lilies in pools. It is best to provide a separate container for each Water Lily or Lotus.

DO NOT DRAIN POOL BEFORE PLANTING

Prepare all the necessary containers, place them at the proper levels (see diagram below) and fill the pool with water. It is a very simple matter to plant Water Lilies and Aquatic plants in the soil below the surface of the water. It is important, however, that the crown of the Water Lily (the growing end) should not be below the surface of the sand.

SOIL

The best soil for Water Lilies and Aquatic plants is a mixture of three parts of good top soil and one part of thoroughly rotted cow manure—a heavy clayey soil is very satisfactory. Muck from swamps, soil from woods, peat moss and sand should NOT be used in the soil. Recognizing the increasing difficulty of securing well-rotted cow manure, our chemists have made up a formula for a commercial fertilizer best adapted for water gardening. It is offered under the name of "PRAEFECTA" and is listed on page 18. Being a highly concentrated product, it should be used sparingly. Two pounds is sufficient for three bushels of soil and should be thoroughly mixed with the soil.

PLANTING

Hardy Water Lilies may be planted quite early in the Spring but not until the water has warmed up so they will start immediately into new growth. In the latitude of Chicago, Cleveland, and New York, this date is usually toward the latter part of April. For Tropical Water Lilies the first week in June is usually the proper time in the same locality mentioned above. For points south of this line the date is, of course, earlier. Tropical Water Lilies especially should be planted in full sunshine and in a depth of water from 6 to 8 inches. Hardy Water Lilies do best in a depth of water from 8 to 12 inches. Lotus in the same depth as the Tropical Lilies. In the listing of Shallow Water Plants we have indicated the most satisfactory depth but this rule is not arbitrary. While some do best in soil just covered with water, others do best in 6 inches of water. So, a happy medium can be met by using an average depth of 3 inches. (Consult diagram, right.)

LOTUS

Lotus tubers look very much like bananas. The usual cause of failure with Lotus is by careless handling of the tubers, deep planting in soil, too great a depth of water, or transplanting in cold water. They do need rich soil and plenty of room. Place the tuber in a horizontal position 2 inches below the surface of the soil and provide a depth of water 4 to 6 inches when first planted. After becoming well established the depth of water can be increased to a maximum of 12 inches. But an average depth of

8 inches of water is ideal. Handle tubers carefully in unpacking and planting so that the growing end is not broken. Pot plants are usually obtainable late in the season and are simply tubers started into growth in pots in tanks in our greenhouses and when received are planted exactly the same as Tropical Lilies by pressing the ball of earth into the soft mud to a position just below the surface of the sand. All soil in pools should be covered with approximately 1 inch of clean sand which prevents any particles from the soil floating into the water and discolored it.

SCAVENGERS

Immediately upon arrival place the Scavengers in the pool in shallow water—as on the tops of the water lily boxes. If shipped quite a distance, or a long time on the way, it is natural for the Scavengers to become very dormant and if placed in deep water might not have enough strength to reach the surface of the water and thus adjust themselves to new conditions.

WINTER CARE

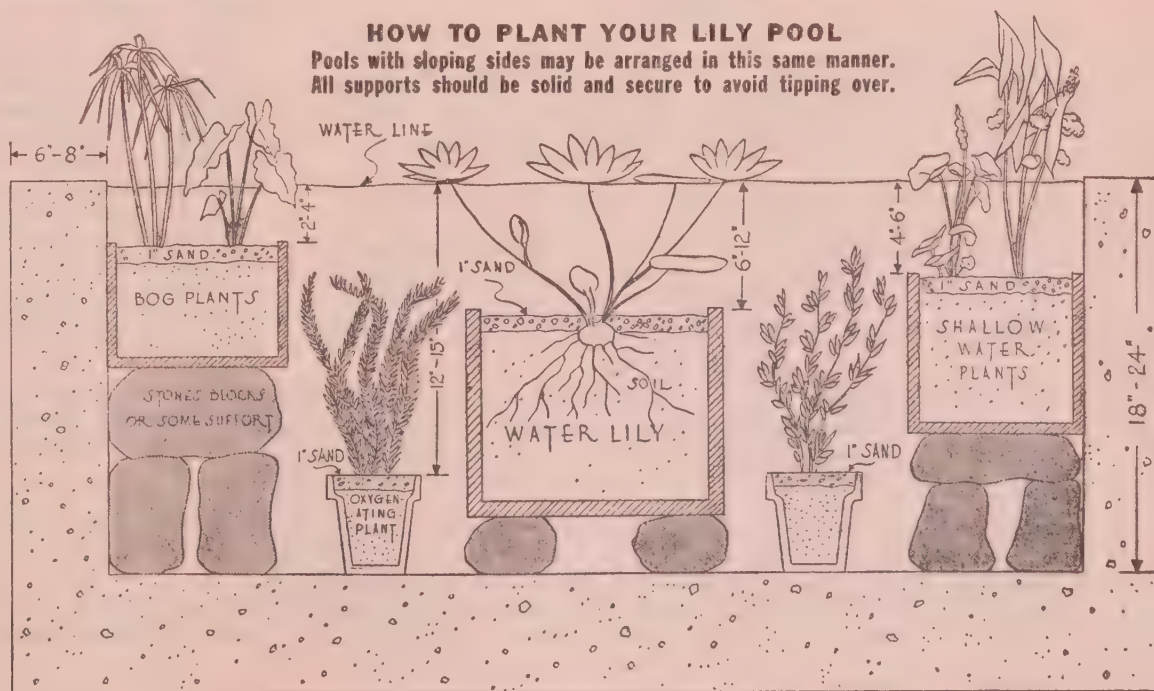

The Hardy varieties of Water Lilies can be easily wintered if they are not allowed to freeze. The tender sorts, Tropical Lilies, had best be renewed each year if the best flowering results are to be expected, unless a greenhouse pool is available to which to move them. The one condition necessary for safe wintering of Hardy Water Lilies is to see that the roots are not actually frozen. Under natural conditions, Hardy Water Lilies, Lotus and native aquatics winter in the ponds under water and seldom need protection unless the water gets very low or the winter is most severe. In small pools where the Hardy plants are planted in boxes or in the bottom of the pool, it is advisable to drain the pool and fill with leaves. For larger pools where one intends to leave fish in the pool, it is advisable to cover the pool with shutters made of tightly fitting boards. On top of the boards may be raked a pile of leaves 12 to 15 inches thick. The leaves should extend beyond the edges of the pool. It is advisable to cover the leaves with corn stalks, brush or chicken wire to keep the leaves from blowing away. If the roots are planted in boxes, another method is to remove the boxes containing the roots and store in a cool basement, keeping them covered with moist peat moss, leaves or burlap until Spring.

PESTS

Many people fear that a pool may become a breeding place for mosquitoes. This could easily happen but is most successfully controlled by the introduction of Goldfish into the pool. Goldfish will destroy mosquito wigglers even before they become visible to the naked eye. The Black Aphid is the usual plant pest. It is easily controlled by a force of clean water or, in cases of infestation, by spraying with our Aquaticide (see page 18). Any other pests are unusual but can be controlled with our Aquaticide.

HOW TO PLANT YOUR LILY POOL

Pools with sloping sides may be arranged in this same manner. All supports should be solid and secure to avoid tipping over.

READ THIS PAGE BEFORE ORDERING

HOW TO ORDER—TERMS AND POLICIES

Remit by money order, draft, express money order, or check.

Always use order sheet for making out your order.

Please do not mix your order and letter together on the same sheet.

SEND YOUR ORDER TO THE OFFICE NEAREST TO YOU. Independence, Ohio, is just outside of the city of Cleveland; Saddle River, New Jersey, is just outside of New York City.

ORDER EARLY

This is important for two reasons. By ordering early you are certain of getting exactly what you want. In May and early June our shipping department is usually overcrowded and orders received then must sometimes be delayed. All orders which are not shipped within forty-eight hours are acknowledged and are filled in rotation received as planting time arrives.

CANADIAN CUSTOMERS may avoid delay by enclosing with their order the number of their permit to import. The form is obtainable from the Plant Pest Board, Dept. of Agriculture, Ottawa, Ontario, Canada.

CAUTION

Be sure to give your name in full, express office, post office, R.F.D., street address, name of city or town, and state.

HOW AND WHEN WE SHIP

All shipments travel by express collect. If ordered to be shipped by parcel post, the purchaser must agree to refund any postage which we advance. But, all parcel post packages must travel at purchaser's risk. Live fish are shipped in water and must go by express.

HARDY WATER LILIES can be shipped April 1st to places in the South but the proper planting time in the latitude of Chicago, Cleveland, and New York City is during May and early June.

TROPICAL WATER LILIES and other Tropical items for the same latitude should not be planted outdoors before the first week of June but will be ready for Southern points much earlier. The water temperature for tropical items should be at least 70 degrees in the outdoor pool.

Goldfish, Aquariums, Oxygenating plants and supplies can be shipped any time during the year.

Tropical fish, for protection against variations of temperature, are shipped in cans in corrugated boxes.

During cold weather we ship in special containers well insulated against cold. All containers, including packing material, in which we ship Tropical fish must be returned promptly, so that we can use them for other shipments. It costs only 36 cents to return an empty container from any part of the U.S.A.

TERMS

Effective January 1, 1950, *these prices cancel all other prices.* We accept orders only when accompanied by funds sufficient to cover the cost of the goods ordered. We do not ship perishable material C.O.D. nor do we open charge accounts until satisfactory references have been submitted.

When ordering goldfish, kindly include 50¢ for shipping can. This can is not returnable.

Large orders of goldfish are shipped in special containers (they cost us \$15 to \$20 each) which must be returned at once by prepaid express. It costs only 36 cents to return an empty container from anywhere in the U.S.A.

GUARANTEE

We guarantee our plants to be true to name and to grow. If any plant fails to grow and we are notified within 30 days after planting, we will replace any plant that fails to grow, free of charge, customer to pay shipping charges only.

This guarantee applies to Tropical Lilies only when we are allowed to ship them at a date considered safe for planting, which is June 1st in the latitude of Cleveland and New York City. This liberal guarantee assures you of complete satisfaction on every order sent to Tricker.

WE ARE NOT LIABLE

for damage which occurs in transit. If shipment is not received in good condition notify us, enclose a bad order report from your express agent (Form 679) and we will make the claim for you and will replace the damaged goods as quickly as possible. The bad order report properly filled out is absolutely necessary to expedite replacement of damaged goods. Claims must be made immediately upon receipt of the shipment.

OUR PRICES

We believe our prices are as low as any reliable grower can offer in the same grade of goods. Some may offer lower prices but the best goods are always the cheapest in the end. Try ours.

DEALERS' PRICES

We can offer attractive prices to dealers, florists and nurserymen. Such prices will be sent only when request is made on business stationery or a business card is enclosed.

Use Praefecta Fertilizer

For Your Water Plants

After years of experimental work in our laboratory we perfected a scientifically prepared chemical fertilizer, our Praefecta, excellent for water lilies and aquatic plants. It can also be used for any other form of flowers and perennials with excellent results. Mix one quart with each three bushels of soil or use a small amount any time to feed plants. Apply according to instructions on containers. Stimulates growth of plants. Be sure to include Praefecta with your order.

You are invited to visit
**OUR WATER GARDENS
 AND SHOW ROOMS**

How to reach us

It is easy to find your way to our show grounds. In fact, Saddle River will be accessible to all those going to or from New York City via the George Washington Bridge. Saddle River, N. J., is northwest of New York City and reached from the George Washington Bridge over Routes 4 and 17 to Hohokus, then north to Saddle River.

Independence, Ohio, is really a suburb of the City of Cleveland. Thus our gardens are but a short drive from any part of the city of Cleveland, as we are but eight miles south of Cleveland Square on Route 21, the main highway running from Cleveland and Akron. Not only will you be able to see water lilies and other aquatic plants growing and in bloom at these two plants, but you will be able to view our show rooms of interesting tropical fish as well.

Can you imagine the beauty of thousands of water lilies in bloom at one time? This is just one of the sights you will see if you pay a visit to either of our water gardens during the growing season. At both our plants there are excellent displays of all varieties of ornamental fish. These alone will repay you for your visit. Each year we have visitors who come from every section of this country, and some from abroad, to visit the home of the largest water lily growing industry in the world. When you are in this section of the country we hope you will pay us a visit.

TRICKER
 is Famous for Tropical Fishes
CATALOG ISSUED IN THE FALL
 SEND FOR COPY

For years Tricker has imported and grown a complete list of the most interesting of tropical fishes. At both Saddle River and Independence, these fish may be seen in especially built display tanks. If you are a fish fancier by all means write for Tricker's list of tropical fishes. It will be sent to you this fall.

YOUR COOPERATION WILL BE APPRECIATED

You can be of great help to us in making future advertising plans if you will assist us by giving the information asked for below. We also wish to take this opportunity of thanking our hundreds of loyal friends in every section of the United States who not only order from us year after year, but continually recommend us to their friends. We value this good will above all our other assets.

Where did you first hear about our Water Lilies and Ornamental Fishes?

Do you know some folks who would like a copy of our catalog?

COLLECTION NO. 38 FOR SMALL POOLS

\$15⁰⁰

Tricker's Complete Pool Collections For 1950

These specially arranged low priced collections for different sized pools offer everything needed to make your pool satisfyingly beautiful and complete. For most attractive results, arrange the aquatic plants in groups and about the margins of the pool with one group or single plant as a centerpiece in same manner as shown in the illustration below. Place the lilies from 2 to 5 feet apart, according to the size of pool.

This collection includes everything needed in water plants to attractively plant a small pool 4x6 feet or 5x7 feet, and Fishes, Scavengers and Supplies. The illustration below shows how water plants offered in this collection may be arranged in their natural setting.

This really is a beautiful grouping and a specially fine value. Collection No. 38 includes the following:

Three Lilies—Your Choice of:

The Star Trio (No. T-8)—Castaliflora (pink day-bloomer); Emily Grant Hutchings (red night-bloomer); and Henry Shaw (blue day-bloomer).

Or, The New Jersey Trio (No. H-2)—Paul Harlot (orange-pink, hardy); Gloriosa (red, hardy); and Fire Crest (deep pink, hardy).

Or, The Cleveland Trio (No. M-2)—Cleveland (pink day-bloomer); Attraction (red, hardy); and Judge Hitchcock (blue day-bloomer).

17 Aquatic Plants as follows:

8 plants for centerpiece as follows: Papyrus, Imperial Taro, Umbrella Palm, Variegated Sweet Flag, Primrose Willow, Floating Heart, Forget-Me-Not and Parrot Feather.

6 Oxygenating Plants as follows: 2 each of Cabomba, Milfoil and Anacharis.

3 Floating Plants as follows: 1 each of Water Hyacinth, Shell Flower and Water Fern

Fishes, Scavengers and Supplies

Collection No. 30E, as follows: 6 3-to-4 in. Goldfish; 6 4-to-5 in. Goldfish; 4 4-to-5 in. Calico Shubunkins, 6 each of Tadpoles, Livebearing Snails, Black Ramshorn Snails, 2 Clams and 2 American Salamanders.

2 lbs. Praefecta, our special water lily fertilizer.

Complete collection for small pool. Collection No. 38, a most unusual value, for.....\$15.00

COMPLETE COLLECTION NO. 39 FOR MEDIUM SIZED POOLS

\$22⁵⁰

Everything needed for a rectangular pool 6x6 ft. or round pool 7 or 8 ft. across. Very similar to small pool collection illustrated, only it includes more varieties:

4 Water Lilies—Choice of Collection H-3, James Brydon, Comanche, Gonnere, Sunrise, or, Collection T-6, Independence, August Koch, Juno, H. C. Haarstick.

8 Plants for Centerpiece, 6 Oxygenating Plants and 3 Floating Plants. Same as Collection No. 38 (Above). Fishes and Scavengers as follows: 3 Young Giant Goldfishes; 6 Selected Goldfishes, 4-6 inches; 6 Shubunkins, 4-5 inches; 6 Tadpoles, 6 Livebearing Snails, 6 Black Ramshorn Snails, 2 Clams, and 2 American Salamanders.

2 lbs. Praefecta.

Complete collection for medium sized pool. By express collect. Col. No. 39, special for only.....\$22.50

COMPLETE COLLECTION NO. 37 FOR POPULAR SIZED POOLS

\$28⁵⁰

This is our best answer to the question of what to put in a pool 7x9 ft., 8x12 ft., or 12 ft. across

5 Water Lilies—Choice of Col. H-11, Paul Harlot, Attraction, Chromatella, Gladstone, Rose Arey; or, Col. M-5, Marliac Flesh, Gloriosa, Paul Harlot, Chromatella, Blue Beauty.

36 Aquatic Plants—18 Plants for Centerpiece (Col. B-4), See page 17; 12 Oxygenating Plants and 6 Floating Plants (our selection).

28 Fish—4 Young Giants, 12 Shubunkins, 4-5 in., and 12 Selected Goldfish, 4-6 in.

25 Scavengers—Collection 34-A. 2 lbs. Praefecta.

By express collect. Collection No. 37, all for.....\$28.50

Pool (below) portrays the beauty Tricker's Small Pool collection easily achieves. Note attractive arrangement of this small collection and beautiful contrast of lilies and foliage.

An excellent illustration of double-flowering Lotus. A fine addition to any pool.

FLOATING PLANTS

SOME of the finest aquatics will grow and bloom merely floating on the water surface, deriving nourishment from the air and water. In nature they drift to shallow water where the roots soon anchor and growth is very rapid. In other words, Floating Aquatics are always at home in any pool.

AZOLLA (*Azolla caroliniana*). Small, crinkly, green plants resembling floating leaves of arborvitae. Strong sunlight turns Azolla a deep red. Per portion, 25¢.

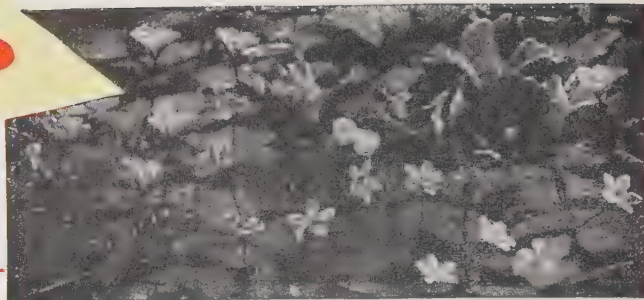

DUCK WEED (*Lemna minor*). Appears as a series of green polka dots on the surface. The small roots are much appreciated by goldfish. Hardy. Per portion, 25¢.

SALVINIA (*Salvinia braziliensis*). Dainty leaves of soft green, covered with a velvety nap of tiny hairs. The growth forms an attractive chain of these leaves which are about 1/4 inch in diameter. Popular as an aquarium plant. Per portion, 25¢.

WATER FERN (*Ceratopteris thalictroides*). Though an aquatic species of the fern family, the leaves greatly resemble garden lettuce. Numerous small plants spring from the edges of the leaves, gradually building up a floating mass of some size. The new plants may be detached and grow to some 6 inches in diameter before starting to propagate. 15¢ each; \$1.50 doz.

SHELL FLOWER or WATER LETTUCE (*Pistia stratiotes*). A rosette of fluted blue-green velvety leaves. Grows best in a shady pool. 20¢ each; \$1.75 doz.

WATER SNOWFLAKE (*Nymphoides indicum*). A lily-like plant with beautiful green leaves which float away and re-establish themselves in shallow water to produce dainty white flowers, fringed like a giant snowflake. We ship well rooted plants from pots. Plant 2 to 3 inches below surface of water in full sun. 30¢ each; \$2.50 doz.

Water Lettuce, Floating Heart, Water Snowflake, Salvinia and Duck Weed

COLLECTIONS—Floating Plants

No. F1. One each of Five Varieties for a Small Pool \$1.25

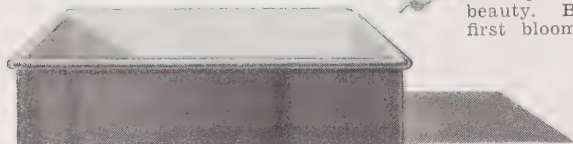

No. F2. Ten Plants in Seven Varieties \$2.35

WATER HYACINTH (*Eichhornia crassipes major*). Shiny dark green leaves, the stems of which are expanded into pseudo bulbs, which serve as air chambers. The orchid-like flowers of lavender form a spike like that of the true Hyacinth. Propagation is by means of runners at the surface, and the growth is so rapid that navigation is hindered in streams in the southern states where they grow profusely. It is, perhaps, fortunate that the plant is destroyed by frost. The long, bushy roots are excellent for receiving the spawn of goldfish; therefore, the Water Hyacinth may be used to advantage in pools of fair size. 15¢ each; \$1.50 doz.

WATER CHESTNUT (*Trapa natans*). A hardy annual resembling the Water Fern in form but with mottled leaves and small white flowers. The large seeds are spiked and armored for protection while wintering at the bottom of the pond. Shipped only after June first. 25¢ each; 5 for \$1.00.

EVERYONE CAN HAVE A TUB GARDEN

For Tubs and Small Pools

Many people feel that limited garden space cannot possibly permit the development of a lily pool. However, a tub garden can be quickly and easily established in a space no larger than two or three feet in diameter. If you are considering a tub garden or have a miniature pool you will find any of these six lilies are ideal for this purpose. There is a wide range of selection and choice of color, for we list suitable tropical as well as hardy varieties. Each is particularly adapted to limited growing areas, and produces an abundance of lovely blooms that are most charming in tiny pool or tub garden.

Interesting and beautiful. Rose-yellow first day... Red-orange second day... Deep red on third day. Price

\$1.75

No. T-37

DAUBEN, Pink
ROYAL PURPLE, Purple
COLORATA, Violet-Yellow

Described at right.....\$6.35

No. H-18

AURORA, Rose-Yellow to Red
WHITE PYGMY, White
JOANNE PRING, Pink

Described at right.....\$5.75

PATRICIA. Charming, free blooming tropical lily. Beautiful crimson flowers. Buds are copper brown. Unusually prolific, bears young plants from center of the leaf. Ideal for tub culture or use in small pools. \$2.75.

ROYAL PURPLE. A handsome new tropical with flowers of a glowing purple that will add a note of regal splendor to your pool. \$2.75.

YELLOW PYGMY. A tiny hardy lily that is ideal for tub culture. Flowers from one to two inches across are a rich golden yellow. Leaves are pleasingly mottled with chocolate. \$1.25

AURORA. The flowers are rosy-yellow on the first day, red-orange on the second, and deep red on the third. Its stamens are orange-red and the leaves are mottled with brownish-red. One of the best hardy lilies for the tub garden. \$1.75.

WHITE PYGMY. Hardy. This is the Chinese Pygmy Water Lily which is best suited for shallow water or tub culture. Flowers are white with golden yellow center and sweetly scented; they are seldom more than 1½ to 2 inches across, but are produced very freely. Foliage dark green, mottled with brown on top, red underneath. A unique and lovely variety. \$2.00.

COLORATA (Pring). This tropical water lily pygmy is well adapted for tub culture. Flowers are from 3 to 4 inches across and bear two rows of pale violet petals, yellow at the base. Stamens are purple, lighter toward the apex and primrose yellow at the base. A very attractive and lovely flower. The mature leaves are circular, dark green above and purplish beneath and sometimes measure more than 4 inches across. \$2.75.

***DAUBEN.** One of the first viviparous hybrids—introduced by the late William Tricker in 1912. Pale lavender-blue flowers. Practically every leaf develops a plant at the center which will produce small flowers very profusely if allowed to spread out. Excellent for small pools or large aquariums. \$2.00.

JOANNE PRING (Pring). A hardy pink sport from yellow pygmy. Flowers are 2 to 2½ inches across and a rich deep pink in color, lighter toward the upper tips. Stamens are orange-yellow on the inside and deep pink on the outside. Foliage is moderate in size, only 2 to 3 inches across and dark green on top. This is an excellent color addition to the very limited list of pygmy water lilies. Supply is exceedingly limited. \$3.00.

Collection Includes—

- 1 Tricker Water Lily Tub, 21 inches in diameter and 11 inches deep, made of white cedar to last a long time.
- 1 Water Lily, your choice of pink, white, yellow, red or blue.
- 6 Aquatic Plants, some to be planted in the tub like the lily and others to float.
- 6 Rock Plants.
- 1 pair Livebearing Snails.

It makes a complete water garden that will delight you all summer. Be sure and tell us your choice of the color of your lily. This collection may be ordered without the tub for \$5.35.

Complete for

\$7.95

Either of the two lilies shown here makes excellent selections for a tub garden.

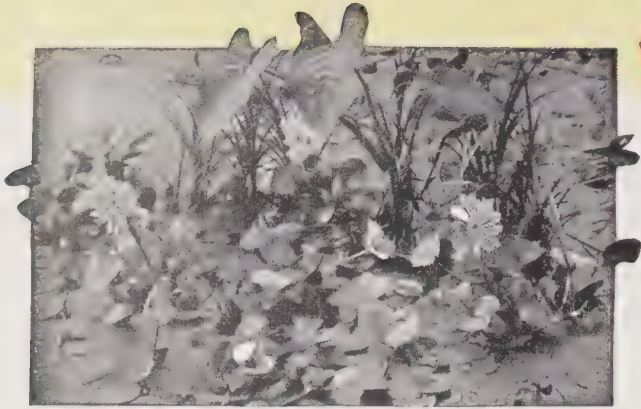

AURORA. One of the best hardy lilies for the tub garden. Flowers are rosy-yellow on the first day, red-orange on the second and deep red on the third. \$1.75.

GLORIOSA. The "best seller" of all Water Lilies. It is extremely dependable. Bright red in color. \$3.25.

Shallow Water

Hyacinth, Poppy, Taro and Spiral Palm
in harmonious grouping

CULTURAL NOTES

Plant the roots of these plants in rich loam. In a concrete pool you may build a ledge or use a box of soil, or you may put individual plants in flower pots set at the proper depths. All of the plants in this list should be planted above or below the water according to their individual needs. The shallow water plants which require 6 inches of water and no more are marked*. Those which do best in 2 inches of water are marked †. Bog plants, marked ‡ like wet feet but do not like to swim or wade; plant them with the crown just above the water level. Many of the bog plants are excellent house plants and will grow indoors if the pot is set in a saucer kept full of water.

Double
Arrowhead

HARDY VARIETIES

†ARROWHEAD, DOUBLE FLOWERING (Sagittaria japonica florepleno). A plant like the Giant Arrowhead in foliage, but one that develops a spike of beautiful double petaled white flowers. Grows well as a bog or shallow water plant. \$1.00 each.

†ARROWHEAD, GIANT (Sagittaria sagittifolia). Distinctive leaves shaped as name indicates and standing 1 to 3 feet above water. Flowers freely in a series of white spikes. Hardy. 50c for 2; \$2 per doz.

*BOGBean (Menyanthes trifoliata). A perennial aquatic with creeping root stocks in shallow water. Its fragrant white flowers are borne on stout stalks, fringed and suffused with pink. 20c each; \$2.00 per doz.

*COMMON CAT-TAIL (Typha latifolia). One of the favorite native swamp plants. Hardy. 20c each; \$2.00 per doz.

*GRACEFUL CAT-TAIL (Typha angustifolia). A tall variety with slender cat-tails more completely developed than the usual type, giving the appearance of being double on the stem. These plants furnish a very fine background in massed planting. 25c each; \$2.50 per doz.

TRICKER'S Special Ten

(Collection No. B-6)

SHALLOW WATER and BOG PLANTS FOR THE SMALL POOL

\$2.85

See listing below for
Miniature Water Garden Collection.

NATURAL Ponds have a profusion of flags, rushes, reeds and small flowering plants which delight the eye. Your pool will be more attractive and much more naturalistic when planted with clumps of these ornamental and semi-tropical plants.

We have divided our list of Shallow Water and Bog Plants into hardy and tropical varieties for your convenience in making selections. However, both groups should be included in your planting, and our collections are made accordingly. The rich, luxuriant foliage of the tropicals gives an effect that is not obtainable when only hardy varieties are used.

HARDY VARIETIES (Continued)

*FLOATING HEART (Nymphaea peltatum). This plant has leaves like the nymphaeas and produces brilliant yellow flowers quite freely. It is hardy and will do well in 2 to 6 inches of water. 20c each; \$2.00 per doz.

†FLOWERING RUSH (Butomus umbellatus). A hardy plant with peculiar three-sided leaves in graceful clumps. Attractive pink flowers are borne on round stems. Fine for naturalizing in a pond. Hardy. 35c each; \$2.75 per doz.

‡FORGET-ME-NOT (Myosotis scorpioides). A well known spring and summer flowering plant with small clusters of clear blue flowers with a yellow eye. Hardy. 25c each; \$2.50 per doz.

†HARDY CALLA (Calla Palustris). This is like a calla lily, but much smaller in size. A desirable plant for shallow water. Hardy. 20c each; \$1.75 per doz.

†IRIS pseudacorus (Yellow Flag). A tall, sword-leaved plant bearing broad yellow flowers of the Japan Iris type. Valuable and attractive. Hardy. 35c each; \$2.75 per doz.

†IRIS versicolor (Blue Flag). Exactly like Yellow Flag except that the flowers are blue. 35c each; \$2.75 per doz.

Cat-Tail †LIZARD'S TAIL (Saururus cernuus). A hardy bog plant growing 2 to 3 feet above the water. Blooms from July to August. Small, fragrant flowers are produced in dense terminal spike, the upper part arching gracefully. 35c each; \$2.75 per doz.

†LOBELIA cardinalis (Cardinal flower). One of the most attractive plants of our native flora, seen along streams and low, moist ground, sometimes a few spikes of rich, fiery cardinal flowers; again in masses, when the sight is dazzling. 35c each; \$2.75 per doz.

†LOOSESTRIFE (Lythrum roseum superbum). A strong plant growing 3 to 4 feet high. Masses of rose-colored flowers on long spikes from late July to September. 35c each; \$2.75 per doz.

†MARSH MARIGOLD (Caltha palustris). Clusters of large buttercup-like flowers of brilliant yellow, early in spring. One of the most attractive native plants. Hardy. 35c each; \$2.75 per doz.

*PICKEREL RUSH (Pontederia cordata). The blue flowers of this plant have made many friends, particularly as they are produced freely. The total growth is about 2 feet. Hardy. 30c each; \$2.50 per doz.

†VARIEGATED SWEET FLAG (Acorus Calamus Var.). A fine hardy plant with saber-like leaves broadly striped green and ivory. Grows about two feet high and is excellent for group planting. 35c each; \$2.75 per doz.

†DWARF SWEET FLAG (Acorus Gramineus Var.). A miniature flag 6 to 10 inches high with green and white stripes. Fine for small pools or tub gardens. 35c each; \$2.75 per doz.

*WATER ARUM (Peltandra Virginica). A hardy aquatic with graceful spear-like leaves and calla lily flowers. 35c each; \$2.75 per doz.

*WATER CANNIA (Thalia dealbata). A handsome canna-like aquatic standing 3 feet high. Hardy. Purple blooms, June to September. \$1.00 each.

†WATER NASTURTIUM OR WATER CRESS. Thrives in sun or shade; ideal near a cold spring. Edible. Hardy Rooted plants. \$1.25 per doz.

†WATER PLANTAIN. A border plant with heart-shaped leaves standing about a foot above the water and surmounted by tall branching spikes of white flowers. Hardy. 20c each; \$1.75 per doz.

†WILD RICE (Zizania aquatica). The importance of Wild Rice as a food for water-fowls cannot be overemphasized. It is easily grown in shallow water and is decidedly ornamental, as it shoots up rapidly and makes a growth of 5 to 10 feet. Panicles of bloom make it additionally delightful. Should be planted in every pond. 20c each; \$1.75 per doz.

AQUATIC PLANT COLLECTIONS

MINIATURE WATER GARDEN COLLECTION (Collection No. B-3)

A group of 10 aquatic plants for the tub garden or small pool which accommodates only one or two lilies.
2 Shallow water plants for centerpiece.
4 Plants for corners or sides of pool.
2 Oxygenating plants.
2 Floating plants.

\$2.30

SMALL POOL COLLECTION (Collection No. B-1)

Twenty plants in 10 or more varieties, our selection, for small pool 4x6 feet or larger, where three water lilies are accommodated.
4 Shallow water plants for centerpiece.
12 Plants for corners or sides of pool.
2 Oxygenating plants.
2 Floating plants.

\$4.25

and Bog Plants

Tropical Varieties

Plant these for exotic effects and for luxuriant foliage.

BUTTERFLY LILY:

‡ **White** (*Hedychium coronarium*). A tall canna-like plant with large leaves and very fragrant white blossoms borne in umbels. A very handsome plant. 35c each; \$2.75 per doz.

‡ **Yellow** (*Hedychium chrysoleucum*). A native of India, and while similar to the preceding variety, is considered the best of the genus and very desirable. In habit it is tall-growing, and the light yellow flowers are followed by bright red berries. Quite desirable semi-aquatic plant. 35c each; \$2.75 per doz.

CALLA LILIES:

‡ **Golden Calla** (*Zantedeschia elliottiana*). The most desirable of the yellow Calla Lilies. Its flowers are as large as the well-known white variety, but are a lustrous golden yellow. The foliage is dark green with translucent spots of creamy white, and adds more to the beauty of the bloom. \$1 each.

‡ **White Calla** (*Zantedeschia aethiopica*). One of the best water plants for summer use. Perpetual flowering; fine white flowers. Not hardy but can be kept indoors through the winter. Flowering plants. \$1 each.

ASIATIC TARO:

‡ **Violet stemmed Taro** (*Colocasia violacea*). One of the very striking Taros. The leaves are a beautiful blue-green. The stems, mid-ribs and veins underneath the leaves are a lovely lavender, the same color being repeated in the edges of the leaves. We do not think that this variety has ever been offered before and we are glad to give you the opportunity now of securing this unusually attractive Taro. \$1.25 each.

‡ **Imperial Taro** (*Colocasia antiquorum illustris*). The finest of the Asiatic Taros. The leaves are attractively blotched a dark brown and violet black. This makes an excellent centerpiece for the small pool or a very satisfactory house plant when potted and grown in a jardiner. 75c each.

‡ **(Colocasia Multiflora)**. A very unique foliage plant. The leaves are rich green, on dark purple stems. As a marginal plant for the pool, it is very ornamental as it will grow to a height of 4 to 5 feet. 50c each.

Taro

Papyrus

freely and are produced continually throughout the flowering season. The flowers resemble our native Pickerel Rush except that there are two shades of color in the petals—light and dark violet blue. Several florets open as the previous ones close, thus giving a long flowering time to the spikes. A tropical plant. Strong plants from three-inch pots. 75c each.

New Pickerel Rush

‡ **SPIDER LILY** (*Hymenocallis Caribaea*). A native plant of the West Indies that produces clusters of fragrant white flowers. The

‡ **GREEN TARO** (*Colocasia indica*). Very similar to the above, except that it is entirely green. A good growing variety. 35c each.

‡ **PAPYRUS or EGYPTIAN PAPER PLANT** (*Cyperus papyrus*). The stalks are triangular and attain a height of 5 to 8 feet. At the top is a tuft of long thread-like leaves which gives the plant a most novel appearance. Shallow water and rich soil spell the best combination for this plant, but it also does well in ground kept slightly moist. Good as a background plant for pools and ponds. 35c each; \$2.75 per doz.

‡ **PARROT FEATHER** (*Myriophyllum proserpina-coides*). Quite successful when planted in a tub or watertight hanging basket. The growth soon goes over the edges in the form of long trailing stems. Extremely valuable for trailing over a fountain. 20c each; \$1.75 per doz.

‡ **NEW PICKEREL RUSH** (*Pontederia paniculata*) from British Guiana. Related to the North American species but far more outstanding. The heart shaped foliage is dark, waxy green and is taller than the native variety. The flowers are borne freely and are produced continually throughout the flowering season. The flowers resemble our native Pickerel Rush except that there are two shades of color in the petals—light and dark violet blue. Several florets open as the previous ones close, thus giving a long flowering time to the spikes. A tropical plant. Strong plants from three-inch pots. 75c each.

Note: This plant requires much nourishment and must either be planted in plenty of rich soil or fertilized often during the season.

‡ **PRIMROSE CREEPER** (*Jussiaea Repens*). A rapid growing partially submerged vine with waxy green leaves and a profusion of bright, yellow flowers. Thrives in sun or shade. Not hardy. 20c each; \$1.75 per doz.

‡ **PRIMROSE WILLOW** (*Jussiaea longifolia*). Erect plants 2 to 3 feet high with attractive narrow foliage and bright yellow blossom profusely borne in the axils of the leaves. Very desirable at the edge of pools or in tub culture. 35c each; \$2.75 per doz.

Five Favorites of the Aquatic Garden

(illustrated above)

- (1) Primrose Willow
- (2) Double Flowering Arrowhead
- (3) South American Pickerel Rush
- (4) Imperial Taro
- (5) Purple Water Hyacinth

Collection No. B-8

\$2.85

petals are narrow and curving and give the plant a characteristic spider-like appearance. 50c each.

‡ **SPIRAL PALM**. A Brazilian oddity something like the Umbrella Palm. Greenish white flowers produced in umbels. 35c each; \$2.75 per doz.

‡ **UMBRELLA PALM** (*Cyperus alternifolius*). Grows well either in small pools or moist ground. 35c each; \$2.75 per doz.

‡ **DWARF UMBRELLA PALM** (*C. gracilis*). This is the dwarf form; fine for aquariums and tubs. 35c each; \$2.75 per doz.

‡ **VELVET LEAF** (*Limnocharis Flava*). An erect growing plant, standing 1 to 2 feet out of water, with elliptical leaves 4 to 6 inches long of velvety green. Flower straw color. 50c each.

‡ **WATER AMARYLLIS** (*Crinum Americanum*). An ideal tropical marsh plant which produces white bell flowers in umbels of six or eight. Very suitable for corners of a small pool. 50c each.

‡ **WATER CANNA** (*Thalia divaricata*). A new introduction. A handsome canna-like aquatic standing over three feet high. Purple flowers. \$1.25 each.

‡ **FOUR LEAF WATER CLOVER** (*Marsilia Drummondii*). Leaves resemble a four leaf clover and form a mosaic pattern on the surface. In crowded spots it sends up a luxuriant growth of aerial leaves. Not hardy. 20c each; \$1.75 per doz.

‡ **PURPLE WATER HYACINTH** (*Eichhornia azurea*). A creeping plant without the floating bulbs of the ordinary Water Hyacinth but with more handsome blooms. 35c each.

‡ **WATER POPPY** (*Hydrocleis nymphoides*). The leaves float upon the surface of the water. Flowers are large and yellow, similar to the poppy. It is in flower almost continuously. 20c each; \$1.50 per doz.

AQUATIC PLANT COLLECTIONS

MEDIUM SIZED POOL COLLECTION

Lily Pool Accessories and Fertilizers

POOL PAINT. Tricker's Sky Blue Concrete Enamel beautifies and stops minor leaks. This non-poisonous concrete enamel is our answer to the many requests we have had for an enamel suitable for concrete pools. This special paint will give a unique color to the pool. Furnished in a beautiful shade of sky blue. Tricker's Concrete Enamel will add life and beauty to the appearance of your water lily pool.

Per Qt. \$1.50
Per Gal. 5.35

MICRO SEAL. Excellent for sealing pool cracks. When painted on concrete, this non-poisonous material makes pool entirely waterproof. Very durable and efficient, it is available in Turquoise Blue, Pale Green, Stone Gray and Spanish White. 8½ lb. package of powder makes one gallon of mix and covers 50-80 square feet on first coat. Complete instructions included.

8½ Lbs. \$2.65

SMOOTH-ON NO. 7. Will stop that leak! Here is a compound that seals cracks in concrete pools or can be painted on concrete to make your pool watertight. Easily applied, harmless to plants and fish, 25 lbs. will waterproof 100 square feet, but small quantity will make a crack watertight. Shipping weight 6 lbs. Please include postage according to the zone you are in from nearest shipping point.

5 Lbs. - \$1.45

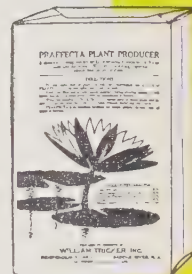

TRICKER'S AQUATICIDE. Keeps your plants healthy and free from injurious insects. Be prepared especially for aphids during the month of August. It is used also for the control of injurious insects on Water Lilies, Shallow Water and Aquatic Plants. A summer spray compound especially prepared in Tricker's laboratories for the effective control of aphids and other insects which might attack water lilies and other aquatic plants. If directions on package for using this spray are followed you can use it without fear of harming plants or fishes. Equally effective on both chewing and sucking insects. Also an excellent summer spray for control of insects on trees, shrubs, plants in leaf and on greenhouse plants. Full directions for use are given on containers.

1 Pint, 65c 1 Quart, \$1.25 Sprayers, 50c

One pint "Aquaticide" will make 4 gallons of 3% spraying solution.

Simplify your work! Plant lilies in our durable, rot-proof PLANTING TUBS AND BOXES...

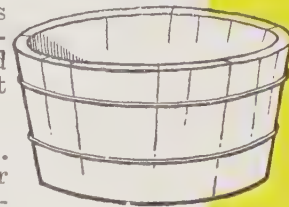

TRICKER'S PRAEFECTA is the best plant food for lilies. After years of experimental work in our laboratory we perfected a scientifically prepared chemical fertilizer, our Praefecta, excellent for water lilies and aquatic plants. It can also be used for any other flowers. Mix one quart with each three bushels of soil, or use a small amount any time to feed plants. Apply it to water lilies and aquatic plants as per instructions given on the containers. It will stimulate the growth of plants, which will bloom more profusely with larger flowers.

REFERTILIZE lilies and aquatics 3 or 4 times during the growing season. For every bushel of soil, wrap one handful of Praefecta in cheese cloth or tissue paper and insert in soil close to the plant roots without moving the containers.

2 lb. carton \$0.75, 3 lb. bag \$1.00, 5 lb. bag \$1.50, 10 lb. bag \$2.75, 25 lb. bag \$6.00

TUBS. Our white cedar tubs make excellent soil containers in which to plant lilies and aquatics. They are sturdily built and will last a long time.

White Cedar
\$3.25

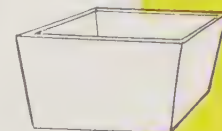

White Cedar Tub, \$3.25. With this tub, 21" in diameter and 11" deep, you can have a delightful miniature water garden. You need a space no larger than two or three feet in diameter. See Tub Garden Collection listed on page 15.

Small Cedar Tub (With Handle), \$1.65. This 14-quart capacity tub or pail is excellent for planting moderate growing lilies. Shallow Water and Bog Plants, also suitable for planting oxygenating plants.

Price \$2.15

PLANTING BOXES. A planting container of wood for lilies and aquatics is preferable to all others. These boxes are made of cedar or cypress wood to insure their lasting a long time.

Large \$2.50

Large Size Box. Suitable for water lilies in pools of medium and large size, 18½" square at top, 10" deep, and 15" square at bottom (outside dimensions).

Small Size Box. For more moderate growing lilies, also shallow water and bog plants, 13" square at top, 8" deep, and 10" square at bottom (outside dimensions).

Small \$1.80

Plants

FOR POOLS AND AQUARIUMS

OXYGENATING

- KEEP THE WATER PURE AND CLEAR
- PROVIDE SPAWNING SPACE FOR FISH

Every pool needs oxygenating plants to keep the water crystal clear and pure. These plants grow under water just like plants you see growing naturally in ponds and lakes. They absorb impurities from the water and liberate oxygen, which action clarifies the water and helps to prevent the growth of Algae that turn the water green. Oxygenating plants are indispensable when fish are present, as they set up a balanced or natural condition of the water. They also will assist materially in raising a batch of baby fishes, as the young fish find much needed shelter and protection among their foliage.

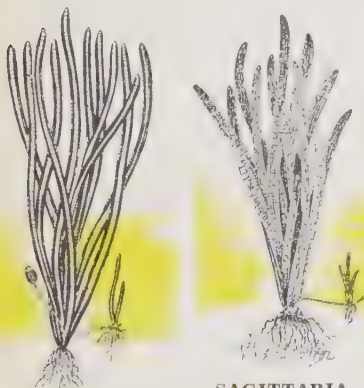

- SHELTER AND PROTECT BABY FISH
- CAN BE ADDED ANY TIME

HOW TO PLANT OXYGENATING PLANTS IN POOLS

Use small boxes or 5-inch pots and plant the oxygenating plants in soil. Leave the soil level an inch below the top of the box or pot and fill up the remaining space with sand. This prevents muddying up the water when the plants are placed in the pool. Place the box or pot directly on the bottom of the pool in between the lilies. A 5-inch pot is large enough to accommodate about three plants. Oxygenating plants should be planted in containers by themselves and should never be planted in the same container with lilies.

LUDWIGIA

VALLISNERIA

SAGITTARIA
SINENSIS

THE BEST OXYGENATORS

A selected group of the best under-water growing oxygenating plants that are sure to grow and thrive in your pool.

- ANACHARIS.** Dark green foliage; lighter stems, 15c each; \$1.50 per doz.
CABOMBA. Glossy green, fan-like leaves. Stems red or green. 15c each; \$1.50 per doz.
VALLISNERIA. Long, ribbon-like leaves. 50c per doz.; \$4 per 100.
MILFOIL (Myriophyllum). Fine, needle-like green leaves in bushy formation, giving appearance of plumes. A favorite for fish spawning. 15c each; \$1.50 per doz.
LUDWIGIA. Foliage green above; pink beneath, 15c each; \$1.50 per doz.
SAGITTARIA SINENSIS. Dark green leaves; strong-growing plant. 15c each; \$1.50 per doz.; \$10 per 100.
SOUTHERN SPATTERDOCK. Broad, light green leaves, very ornamental. 15c each; \$1.50 per doz.
MONEYWORT. Foliage round and light green in color. A very ornamental plant. 15c each; \$1.50 per dozen bunches.

OXYGENATING PLANTS FOR INDOOR AQUARIUMS

We make a specialty of fine tank-grown oxygenating plants for indoor aquariums. Our selection includes every suitable variety of both the oxygenating and ornamental types which are available at all times. If you are interested, write for further information.

COLLECTIONS OF OXYGENATING PLANTS FOR POOLS

FOR SMALL POOL, 3 x 4 feet. 9 plants, 3 each of 3 varieties. Collection No. 0-1 **\$1.25**

FOR MEDIUM SIZED POOL. 5 x 7 feet. 20 plants, 5 each of 4 varieties. Collection No. 0-2 **\$2.50**

FOR MEDIUM LARGE POOL, 8 x 12 feet. 36 plants, 6 each of 6 varieties. Collection No. 0-3 **\$3.50**

FOR LARGE POOL. 10 x 15 feet. 60 plants made up of 7 of the best varieties. Collection No. 0-4 **\$5.50**

ROCK PLANTS

THIS IS A REVISED LIST OF ROCK PLANTS BROUGHT UP TO DATE WITH THE NEWEST AND MOST ATTRACTIVE VARIETIES

Rock plants thrive under adverse conditions and are attractively used as a border edging for the pool itself or for a perennial bed around it. The pool may be edged with rough stone and any crevices that will hold a handful of soil will accommodate one or more interesting rock plants.

9. **MYOSOTIS Alpestris (Forget-Me-Not.)** This variety of rock plant grows very compact and is a very charming plant.

10. **PHLOX Subulata (Moss Pink).** Has moss like, evergreen foliage and flowers are produced in April and May in white, lilac, and pink.
11. **PLUMBAGO Larpentae (Leadwort).** One of the very late flowering rock plants. Flowers are deep blue and the plant grows in a dwarf manner, spreading, 6 to 8 in. high.
12. **POTENTILLA Verna (Cinquefoil).** The strawberry-like leaves of this plant are very attractive. Flowers are produced throughout the summer and are yellow in color.
13. **PRUNELLA Grandiflora (Heal-All).** The violet colored flowers are produced all summer. It does well in slightly shaded positions.
14. **SEDUM Acre (Golden Moss).** The very lovely low growing green foliage of this plant makes it an excellent ground cover. The flowers are produced in great profusion and are yellow in color.
15. **SEMPERVIVUM Vimbrium.** A very desirable form of "Hens and Chickens."
16. **THYMUS Serpyllum Coccineum.** An excellent ground cover which when in bloom is completely covered with brilliant crimson flowers.
17. **VERONICA Repens (Speedwell).** One of the very dwarf growing Veronicas producing light blue flowers, and very desirable.
18. **VIOLA Pedata Tricolor.** One of the very desirable Violas. A good grower and delightful in color.

1. **ACHILLEA Tomentosa.** An excellent rock plant with bright yellow flowers blooming from July to September.
2. **ARABIS Alpina.** A very desirable rock plant producing white flowers in May and in great masses.
3. **ARMERIA Lauchiana (Sea Pink).** A lovely rock plant producing sweet smelling flowers. A pink color, blooming in August and September.
4. **CAMPANULA Carpatia (Harebell).** A pretty species growing in compact tufts. Flowers clear blue and continuing from June to October.
5. **DIANTHUS Deltoides (Hardy Garden Pink).** A charming rock plant producing flowers on stems 10 to 12 inches high. Dark pink in color and like little Carnations.
6. **FESTUCA Glauca (Blue Festuca).** The bright blue narrow leaf foliage of this plant is produced in dense tufts making it a very attractive rock garden plant.
7. **IBERIS Little Gem (Candy-Tuft).** Its neat unusual habit of growth makes it very desirable. The flowers are pure white and are produced in June.
8. **IRIS Pumila.** A very dwarf form of Iris, the foliage often being not even 6 inches high. Flowers in blue or yellow are produced very freely.

All Rock Plants are 35c each; \$3.50 per doz.

Collection No. 29A

15 different rock plants, our selection from the above list, for... **\$3.85**

Collection No. 29B

50 rock plants, in not less than 15 varieties, our selection from the above list, for... **\$12.50**

TRICKER'S Quality FISH FOOD and

CARE OF FISHES

TO successfully raise and keep either goldfish or tropicals, it is essential that the outdoor pool be properly stocked with water lilies and aquatic plants; the indoor aquarium planted with oxygenating plants to produce the necessary oxygen needed for the fish.

OVERCROWDING of fishes should be avoided. In outdoor pools, fish are hardly ever crowded. In the indoor aquarium, it is required to have one gallon of water for every 2 to 2½ inches of goldfish body, or one gallon of water for 2 to 3 pairs of tropical fishes.

Whenever fish continuously swim near the surface of the water, it indicates that the oxygen is exhausted and immediate relief should be given by changing part of the water, aerate

it with an air pump or transfer some of the fish to another aquarium.

Tropical fish thrive best at a temperature of 72° to 80° F., whereas goldfish require a lower temperature.

DO NOT PUT TROPICAL AND GOLDFISH TOGETHER.

FEEDING OF FISHES

After years of experimenting, studying and raising various kinds of fish, both tropical and goldfish, we developed foods for all types of aquarium or pool fishes.

Tricker foods are known throughout the country as quality foods, containing all the nutrients necessary for successfully raising fishes.

For **GOLDFISH**, either in the pool or aquarium, we recommend our **IN-NUR-CO** to be alternated with **SUN-CURED SHRIMP**. Feed the goldfish every other day, as much as they will eat in ten minutes. Syphon off unconsumed food from the aquarium with a dip tube.

For **TROPICAL FISH**, we recommend **VITALINE**, a new food we just introduced; **DRIED DAPHNIA**, which consists of carcasses of the tiny crustaceans of fresh water fleas, and **SUN-CURED SHRIMP**, finely prepared. Feed the fish three times daily in small amounts, not more than they can consume in 10 minutes. Syphon off any excess food.

FOODS

THESE foods are prepared and tested in our laboratories by our chemist and have proven excellent for both young and mature fishes. They are the only foods for all varieties of fishes, properly balanced, containing proteins, carbohydrates, mineral salts and other useful nutrients necessary and essential for the growth and sustenance of fishes in aquariums and pools.

Tricker's fish foods are prepared especially for feeding in aquariums without fouling or polluting the water.

VITALINE. The perfect fish food, correctly balanced. It contains all the nutrients and vitamins necessary to the growth and sustenance of either tropical or goldfishes. Tricker's Vitaline will bring out the color in fishes and promote healthy, robust bodies. 1 Tin, 25c; ¼ Lb., 50c; ½ Lb., 85c; 1 Lb. \$1.50.

It seems a miracle to us I received the 3 packages of deodorant and used one immediately and the others at two-day intervals, and am pleased to tell you that our pool is perfectly clear. It seems like a miracle to us.

Mrs. George H. Laws
Woodstock, New York

DRIED SUN-CURED SHRIMP.

An excellent concentrated food consisting of the meat of sea shrimp. Can be fed to both tropical and goldfish. 1 Tin, 25c; ½ Pint, 40c; 1 Pint Carton, 60c; 1 Quart Carton, \$1.10.

DRIED DAPHNIA. Carcasses of the tiny crustaceans of fresh water fleas that are the natural sustenance of baby fishes. Essential to all fishes. 1 Tin, 25c; ½ Pint, 50c; 1 Pint, 90c; 1 Quart, \$1.60.

IN-NUR-CO. A natural food for goldfish, both for an indoor aquarium and outdoor pool. A completely balanced ration of cereals, meats and other valuable nutriment. ¼ Lb., 30c; ½ Lb. Carton, 60c; 1 Lb. Carton, \$1.10.

INFUSORIA POWDER. A product that will produce Infusoria, or the minute live organisms which newly born fish feed on. Directions for its use are given on the label. If you want to raise young fish use Infusoria Powder, 15c per package.

ENCHYTRAE WORMS. This is the only live food available all year around. Small, thread-like worms that are the only practical living food for tropical fish. The worms are easily raised in a mixture of leaf-mold and light soil by feeding with bread moistened in milk, or cooked oatmeal. Single Portions, 75c; Double Portions, \$1.25.

Tricker has loyal customers in all parts of the world. Note Tricker lilies, above, growing in the pools of Pedro A. Arvelo, Caracas, Venezuela, S. A.

REMEDIES

REMEDIES

WE HAVE made a special study of the maladies of aquarium fishes and will always be glad to give you the benefit of our experience. It will be of great help to you to have some of our remedies on hand at all times.

AQUARIUM CONTROL AND TESTING KIT. This is a complete testing outfit, with neutralizing reagents and indicator for acid or alkali, whichever your aquarium water will show. Also complete directions and pH charts covering a range from 6.0 to 7.6. Complete Testing Kit, \$2.50.

TURK'S ISLAND SEA SALT. A tonic beneficial for all minor ills. Add to your aquarium weekly, one tablespoonful for every five gallons of water. In an outdoor pool add one handful for every 50 gallons of water. This will act as a stimulant to fish and growth of plants. 3 Oz. Box, 20¢; ½ Pint Box, 30¢; 1 Pint Box, 45¢; 1 Quart Box, 65¢.

TRICKER'S FUNGUS CURE. An anti-septic tonic and healing preparation, particularly beneficial to fish when fins are frayed or the scales coated with white scum or fungus growth. Treat fish directly in the aquarium or pool, using one tablespoonful for every five gallons of water or one handful for every 50 gallons of water twice a week or as needed. 3 Oz. Box, 20¢; ½ Pint, 30¢; 1 Pint, 45¢; 1 Quart, 65¢.

TO REMOVE ALGAE

TRICKER'S DEODORANT AND OXIDIZER FOR POOLS AND AQUARIUMS

This preparation will free your pool or aquarium of **Algae, Green or Foul Water**. It also proves an effective remedy for **Fungus, Anchor Worms and Fish Lice**. Sometimes it is necessary to treat the water three or four times at 3-day intervals. Give us the capacity of your pool in gallons or cubic feet of water; or the measurements of your pool and we will figure out the amount of remedy required for positive results. Tricker's Deodorant and Oxidizer is also used for sterilizing pools and aquariums, by using a strong solution when cleaning. 1 oz. bottle, 35¢.

ARGUCIDE kills **Fish Lice** and **Anchor Parasites** on Goldfish and helps to keep pool water clear. Argucide is a concentrated insecticide furnished in dry powdered form to be dissolved as needed. The 2-ounce package treats 1200 gallons and is usually sufficient to care for pools up to 400-gallon capacity for a year. The 4½-ounce package treats 3,000 gallons and is for pools of 500 to 1,000-gallon capacity. Argucide does not hurt Goldfish, Plants or Snails when used as directed. Complete easy instructions in each package. Nothing to remove from pool. 2 oz. package, \$1.00; 4½ oz. package, \$1.50.

C. D. T. COMPOUND. An excellent fish remedy, water neutralizer and water purifier for aquariums and pools. Five drops per gallon of water will cure fish infested with **Fluke, Fin Rot, Mouth Diseases**, and kills **Fish Lice** without injuring the fish. Have a bottle of this remedy on hand at all times. 1 oz. dropper outfit for aquariums, 40¢; 3 oz. bottle for pools, 75¢.

ICHTHYOPHTHERIUS REMEDY. Two drops per gallon will destroy the "Ich" parasites in five days without injuring the plants or fish. Advisable to increase and maintain a uniform temperature of 75 to 80 degrees for tropical fish. 40¢ per bottle in special dropper outfit.

PURO. Water purifier. Contains chemicals which neutralize excess acid or alkali in the water, purifying it and destroying germs. The pink counteracts Ichthyophtherius; the blue kills Pathogenic germs. 15¢ each; 2 for 25¢.

HELPFUL BOOKS AND BOOKLETS

FOR GARDENS AND POOLS

GOLDFISH VARIETIES AND WATER GARDENS, by Wm. T. Innes. Careful and explanatory directions on all phases of Water Gardening, including handsome examples of many styles of pools. Also large section on plain and fancy Goldfish, including amateur and commercial breeding. \$5.50.

EXOTIC AQUARIUM FISHES, by W. T. Innes. A revised edition by an author famous for his knowledge of fishes and aquarium subjects. Covers tropical fish thoroughly and is profusely illustrated with color plates and halftones. Undoubtedly the finest work in its field. \$7.00.

MODERN AQUARIUM, by W. T. Innes. A book on breeding and general care of goldfishes and tropicals, 64 pages, 30 illustrations. \$1.00.

MODERN FAMILY GARDEN BOOK. This is a very practical little book, containing chapters on all kinds of subjects of interest to gardeners. \$1.75.

COMPLETE BOOK OF GARDEN MAGIC. This book consists of 320 pages of very useful information and contains 17 full color illustrations. The practical, helpful ideas in this book are along the lines of the smaller book but much more complete. This also is an excellent book for the price. \$3.50.

TROPICAL FISH HANDBOOK. An excellent book for the beginner, giving helpful information on how to arrange an aquarium, the proper temperature, care of fishes, etc. 30¢

YOUR AQUARIUM. Primer for beginners. A book that will help solve many of your problems . . . by W. T. Innes . . . 25¢.

HOW TO BUILD A LILY POOL. Send for this special 16-page booklet which gives full instructions on how to construct both formal and informal pools. Illustrated by plans and charts. 15¢.

. . . . Everyone Admires It

. . . . Our pool has cleared up beautifully since we have put in the deodorant and snails and we are so pleased. Everyone admires it and we are certainly very thankful to you.

Mrs. Viola Lucas, Hempstead, New York

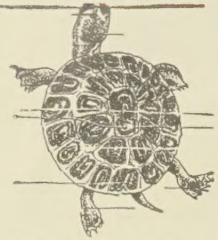

"I have used your In-nur-co . . ."

"for years and am perfectly satisfied with the results. It keeps my fish in robust health. I could not ask for more."

Mr. Leon S. Barndt, 146 East 4th Street, Bloomsburg, Pa.

SCAVENGERS

FOR POOLS AND AQUARIUMS

GEOGRAPHIC TURTLE

WE cannot say too much in favor of scavengers for your lily pool. Scavengers are the housekeepers of the pool and water garden. Your fish feed upon insects; snails devour algae and green scum; tadpoles eat decayed matter, and clams or mussels continuously filter the water to keep it clear. All this helps to keep your pool healthy—free of injurious insects which harm plant life, making your pool clear and attractive to the eye.

For your convenience we are listing some of the most valuable and interesting scavengers that keep pools and aquariums clear. See page 19 for oxygenating plants.

RED RAMSHORN SNAIL

CORAL SNAILS (*Planorbis rubrum*). Known as Copenhagen Red Snails. These are the finest aquarium snails in existence, and their coral red bodies and shells make them colorful as well as useful. Also known as Red Ramshorn. 6 for 55¢; \$1.00 per doz.

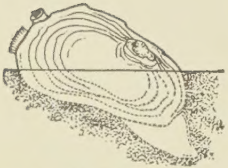

LIVEBEARING TRAPDOOR SNAIL

LIVEBEARING TRAPDOOR SNAILS (*Viviparus malleatus*). These large, hardy snails should be in every pool and aquarium. They devour algae and green scum and thus help to keep the water clear. 6 for 55¢; \$1.00 per doz.; \$6.00 per 100.

BLACK RAMSHORN SNAILS (*Planorbis corneus*). Medium sized snails with shell characteristic of the name. Very prolific egg layers and particularly useful in removing the algae or green scum that forms in the sunlight. 5 for 25¢; 50¢ per doz.; \$3.50 per 100.

MELANTHO SNAILS (*Melanopsis graellsii*). Long spiral shells like the "Horn of Plenty". Active and hard scavengers. 6 for 55¢; \$1.00 per doz.; \$6 per 100.

MYSTERY SNAILS. A new and unusual snail, very useful and interesting. They lay their eggs above the water on plants or glass. 6 for 55¢; \$1.00 per dozen.

CLAM WORKING IN SAND

GEOGRAPHIC TURTLES. The most popular item in this list though admittedly more ornamental than useful. Little fellows about two inches across and with curious mosaic or maplike designs on both upper and lower shells. Like all water turtles they like to sun themselves and while waiting for lily pads to grow, they should have a rockery or floating board for this purpose. 35¢ each; 6 for \$2.00; 1 doz. \$3.85.

AMERICAN SALAMANDERS. A harmless species of water newt that may or may not be fireproof like its fabled ancestor. Golden brown with red lines and black dots on the back; yellow spotted with brown beneath. Closely related to the frog and fond of insects. 2 for 35¢; \$1.75 per doz.

J. Edgar Hoover writes—

"The fancy goldfish have arrived, and in excellent condition. I wanted you to know how much I appreciate your making this replacement. Also, I want to thank you for your kindness in giving me the advice for the treatment of the fish due to the water in Washington having been very heavily chlorinated. I shall certainly use these precautions."

J. Edgar Hoover, Director,
Federal Bureau of Investigation, Washington, D. C.

AMERICAN SALAMANDER

GREEN FROG

AUSTRALIAN SNAIL

GREEN FROGS. Ornamental, likeable, and the best insect trap ever known. When we see lily pads we expect to see a bull frog nearby. Any size. 60¢ per pair; \$3.25 per doz.

TADPOLES. The younger generation of the frog family that grows legs the first or second season; 3 inches long; active in devouring decayed matter and green algae. Entirely harmless to either fish or plants. These must be sent in water. 75¢ per doz.; \$5.00 per 100.

CLAMS or FRESH WATER MUSSELS. An effective remedy for green or cloudy water. The clam lives by filtering the solid nourishment out of great quantities of water, leaving it crystal clear. They operate best in a few inches of soil or sand where they travel about occasionally and feed with shell or edge half buried in the earth. Use plenty of them and notice the difference in your pool. 6 for 75¢; \$1.40 per doz.; \$10.00 per 100.

SCAVENGER COLLECTIONS

Note: Everything that is shipped in cans of water goes by express, charges collect.

FOR AQUARIUMS OR SMALL POOLS (Collection No. 34-A)

- 6 Tadpoles
- 6 Livebearing Trapdoor Snails
- 6 Black Ramshorn Snails
- 3 Copenhagen Red Snails
- 2 Clams
- 2 American Salamanders

\$1.85

FOR LARGE POOLS (Collection No. 34-B)

- 18 Tadpoles
- 6 Clams
- 12 Red Snails
- 12 Black Ramshorn Snails
- 12 Livebearing Trapdoor Snails
- 4 American Salamanders
- 2 Geographic Turtles

\$4.90

SNAILS (Collection No. 34-C)

It is difficult to get too many snails, performing as they do the useful function of removing decaying vegetation and particularly the green scum-like growth of algae. Use two snails per square foot of bottom area. 100 assorted snails.

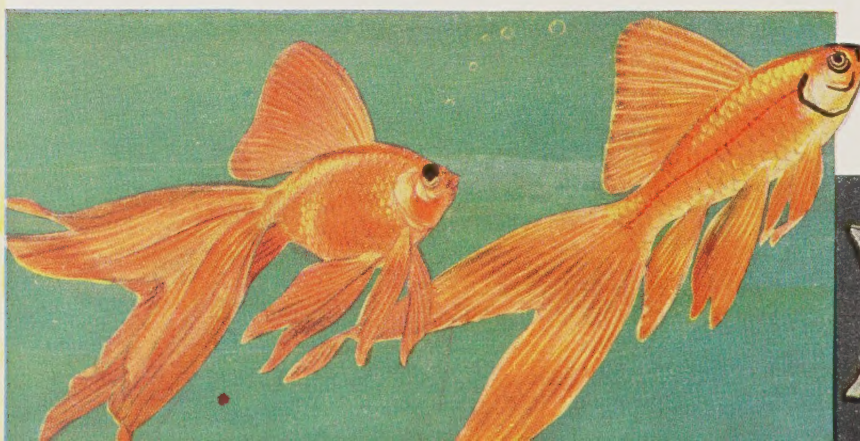

\$5.00

GOLDEN ORF

Golden Orf is a rare fish, and a brilliant one for your pool. They are constantly active. Golden Orf's orange color on its top-side and yellowish gold undermarkings make it very striking in appearance. They often leap out of the water after insects. This native of Europe is extremely hardy—more elongated and cylindrical in shape than goldfish, and being very peaceable, can be kept right in the pool with goldfish.

CALICO SHUBUNKIN

GOLD FISHES

FOR POOLS AND AQUARIUMS

VERY IMPORTANT—PLEASE READ. Have your pool ready to receive the plants and fish when they arrive. The pool should be filled with water for at least three days prior to introducing the plants and fish. IMMEDIATELY upon arrival put the fish into the pool. During transit in crowded cans the goldfish will exhaust the oxygen content of the water; so, immediate transfer is necessary to provide a fresh supply.

During transit, fish are sometimes bruised or slightly injured and in such condition are subject to various fish diseases, among which is Fungus. To prevent Fungus, use TRICKER'S POOL DEODORANT as offered and described on Page 21. This remedy is also an excellent preventative for certain other diseases and parasites.

IMPORTANT CAUTION—Do not put goldfish or other fishes in a new cement pool until the alkali has been removed by draining the pool at least five times during the period of two weeks. The alkali may be neutralized by the use of strong vinegar, 1 quart to 100 gallons of water. Allow it to remain in the water for two or three days; then drain the pool and clean it thoroughly.

PRICES: All fish must go by express, charges collect. When you order gold fish, please include 50c extra to cover the cost of a shipping can which is not returnable. Large orders of fish will be shipped in our large returnable cans. (See Terms on Page B.)

SELECTED GOLDFISHES. Brilliantly colored and active. A fine strain prized for garden pools and ponds. Beautiful markings in black, white, red and silver.

4 to 5-inch	.75	3.50
5 to 6-inch Breeders	1.25	6.25
6 to 7-inch Breeders	1.50	7.50

CALICO SHUBUNKINS. (Straight Tails). The name "Shubunkin" means "Autumn Brocade." This is a fitting name, for the fishes are marked in a brocade pattern of glorious colors like autumn foliage, and even more varied. Blue is the predominating color, with mottled effects in red, gold, black, brown, lavender and white. (See illustration on page 22.) Their active movement displays these colorings.

Our most popular collection for a small or medium sized pool.

GOLDFISHES FOR THE LARGE POOL GIANT GOLDFISH

These Giant Goldfish are raised in large lakes. They are more sturdy in body and are really giants as compared to ordinary goldfish. Our supply of Giant Goldfish is LIMITED, but while they last, we offer these Selected Breeders, as follows:

8 to 9 in. long _____ \$2.50 a Pair; \$ 6.50 for 6
10 to 12 in. long _____ 5.00 a Pair; 12.50 for 6

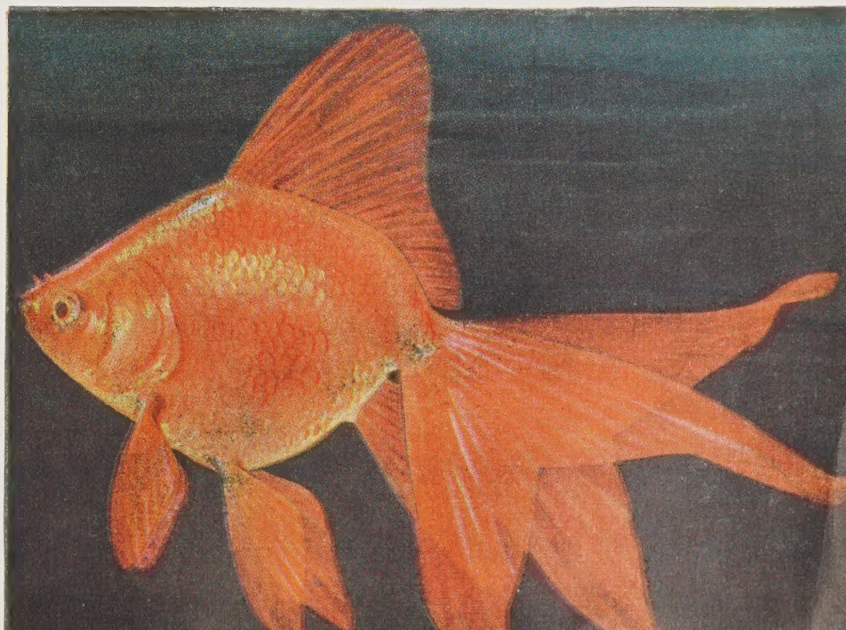

Collection No. 30-L

- 1 Pair Giants 10 to 12 in. long
- 2 Pair Young Giants 8 to 9 in. long
- 12 Selected Goldfish 4 to 5 in. long
- 12 Calico Shubunkins 4 to 5 in. long
- 1 Pair American Fantails 4 in. long

Collection Price

\$16.50

FANCY AMERICAN FANTAIL

TRICKER'S FAMOUS RAINBOW COLLECTION

An Old Favorite

(Collection M-5)

\$11.55

Tricker's famous Rainbow Collection needs no further introduction to garden lovers. It is comprised of four hardy varieties and one tropical lily. Together, they make a gorgeous show in the rainbow shades and each lily is a gem in its particular class or color.

No. 1. MARLIAC FLESH. Delicate shell-pink. Opens early in the morning.

No. 2. GLORIOSA. Large red, the finest red. Flowers perfumed like apple blossoms.

No. 3. COMANCHE. Flowers rich apricot changing to deep coppery bronze as the flower ages.

No. 4. CHROMATELLA. Very prolific. No pool complete without it.

No. 5. BLUE BEAUTY. (Tropical.) Flowers deep blue, sometimes a foot across.
